

Orbital Providence

Scholarly Exposition on Naadi Astrology

Satyanarayana Naik

Preface

There are a number of excellent books written by great scholars and modern authors. I am neither competent to write anything parallel nor to attempt any thing nearer to one aspect of those great works. Forget about writing, it is even beyond my capacity to understand those works fully. To the best of my knowledge and ability I could only grasp a tiny particle out of a drop from that ocean. This being my status in astrology, why and how I dared to write books on astrology is in fact a million dollar question to me. To be honest, for a certain period in my past I was totally against occult and spiritual subjects. Not exactly an atheist but more a pragmatist. This pragmatism is the route cause for getting me into this occult subject. Wanting proof or shall I say reasoning to certain events in my life, like any other common man cursed with the so called ill luck I too ran to the self styled pundits of astrology and had to become a scapegoat. I was vehemently in search of a right Guru/pundit to guide

me. During that period I met a person in Bombay in late 70s. Unlike other occultists this man looked normal and never ever pretended like an expert in astrology. He just asked me to show my hand and then took a "***panchanga of Tamil calendar***" and looking at the day's chart, started blasting past events and present situations of my life. While presenting my future he repeatedly pointed out that I would write books on Astrology. This sounded absurd to my mind at that time. I laughed and he also returned a smile with all that conviction and confidence in what he predicted. Some of his future predictions precisely were true and I was fascinated to know about this subject. The next best thing I did was to grab the astrological books with TITLES - attractive and CONTENTS - with contradicting thrash. Sensibly, I withdrew studying them and relied more on guidance from the noble and knowledgeable elders in getting worthy texts. Fortunately, due to my multilingual capabilities I could lay my hands on books in various languages which have unfailingly helped me in grasping the subject. One of the disciples of the great pundit of Bombay had given me clue about the Naadi system which the pundit used to follow. This fact drove me to hunt for books on Naadi and a few noble persons helped me in my endeavor to find good books by Sri. R.G. Rao. While studying those books of Guruji I made notes. Except for one or two individuals, most of the astrological community were restraint and reluctant to discuss on this Naadi subject as they found it to be against "Sastra" or "Sastra - virudha". Some expressed their inability to understand the subtle secrets behind this method. Hence, the first task before me was to satisfy and convince this group who were unable to understand the concept of Naadi astrology. Therefore I published my notes as "Prediction Secrets in Naadi Astrology". It definitely took some time to spread but it worked very well. Slowly people took interest in this subject and I feel I am successful to some extent. I started teaching regularly at

different institutions and for the last three years the attendance is increasing year by year. This awareness has grown across the country and demand for the books on Naadi astrology is on the rise.

"Celestial Matrix" was the 2nd book written by me which deals with planetary combination for certain life orientations. This book also has an introduction to **Hora**. The importance of Hora lord was established with examples to differentiate births during the same time.

The 3rd book on Naadi Astrology was "Revelation from Naadi Jyotisha". In this book, for the first time, the astronomical facts were introduced convincingly relating them to astrology. The planetary orbits forming Zodiac, divisions of Sun trine and Moon trine, the concept of Moolatrikona and many more were discussed in relation to metaphysics. This was absolutely an experimental work. The fact that the results from Naadi and classical approach remain same was proved with examples discussing in both the methods. This was the first step towards bridging gap between both the systems for confident delineations and it was proved beyond doubt that the Naadi system is well with in the "Sastra". In fact in some of the classical texts there is an independent chapter which deals with the results from the combination of planets. (Refer works of Varaha Mihira).

About the Book

Each person is born with specific life orientation, predestined by cosmic plan which is evident in the orbital providence. This aspect is being dealt in this book. The relationship of Zodiac signs to the orbits has already been established in my earlier book. Zodiac represents the orbits of planets. Time and again, due to movements of planets these zodiac signs acquire significations both at macro and micro levels in accordance with the progress of the universe. In other words, the progress of the universe is caused by the movements of planets in the orbits forming zodiac signs. This work is an attempt to decode the significations of zodiac signs. An effort is made in this work to link the Hora sequence to signs. This concept is drawn from Ashtakavarga of classical approach. In order to incorporate Rahu and Ketu in Rasi division some modifications are inevitable. Again taking the astronomical base the Rahu and Ketu were introduced to divide a sign in accordance with orbital sequence. This concept I have applied to some of the horoscopes. I have also included some important new predictive techniques which have not been disclosed in any of the books so far. These were put to test and were found to be extensively applicable. I have introduced the concept of Pancha Bhoota under "Diseases" chapter. Work is in progress to bring out separate volume on Medical Naadi Astrology discussing in detail with remedies.

From a fundamental matter relating to Astrology an idea shapes into a technique and when/if it is convincingly applicable, the same is published for the benefit of readers. This, naturally, not only restricts number of new books but also takes time to publish.

In chapter ten an innovative attempt is made to introduce psychology into astrology. In the recent years study of the brain waves have made remarkable progress in the field of psychology. There are several modules of programming the sub-conscious mind. One such popular module is "past life regression" which has attracted many people across the world. This is a universal acceptance of Eastern philosophy of previous birth and karma theory. This is the right time to incorporate the human related science development in to astrology and re-structure the principles not deviating from the original standards.

In this chapter modified principles of Naadi astrology are given for a structured approach to understand conscious, super-conscious and sub-conscious levels of brain. Without going through any psychological test or programme, we can assess functional levels of the brain in different matters of life.

I owe regards to each and every one in my friend circle, my family members and Sagār publications for their forbearance, cooperation and support.

Always in the service of Lord

Yours

Chapter 1

Orbital Direction

In my previous book "**Revelation from Naadi Jyotisha**" I had explained about the concept of Lagna, emergence of microcosm from the macrocosm and the karma theory behind it. Apart from it I have also explained about the Sun trines and Moon trines.

I have not given the astronomical relationship for the grouping of Sun trine and Moon trine in my previous book. Before going into the details of path of destiny I would like to discuss on the astronomical relationship between Sun trine and Moon trine.

By looking at the figure we can understand that the earth is going round the Sun while spinning from west to east. Thus there is an influence of Sun, **the Atma**, on the earth which is inter-related to Lagna and the emergence of microcosm as explained in my previous book. Therefore, the

West and East directions represent the **Karma** (the **Saturn**) and the **Rinanubandha** (Atma sambandha, the Sun).

The Sun sign Leo and the trines thereof, Sagittarius and Aries, represent the Sun trine of Rinanubandha.

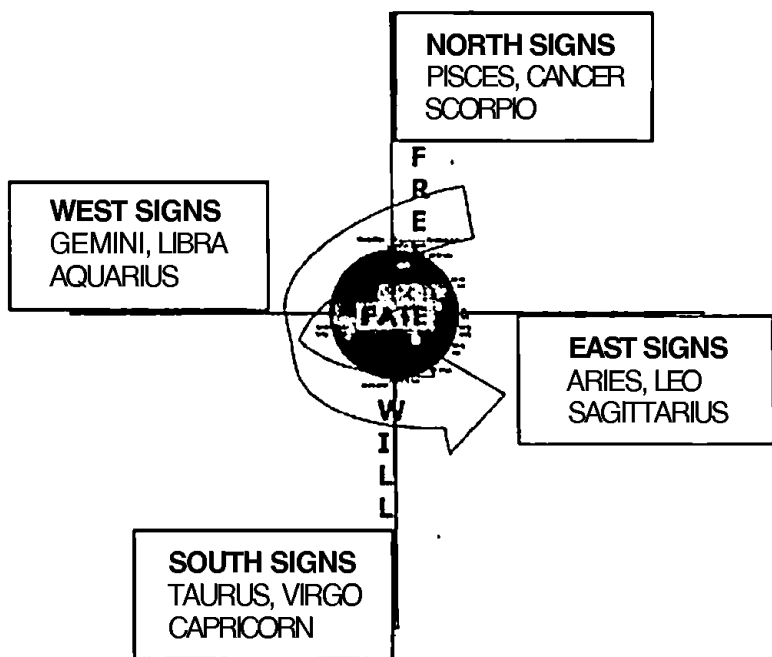

While the opposite sign of Leo being Aquarius, represented by Saturn, indicates the Karma and the trines of Aquarius, Gemini and Libra, indicate the Buddhi and Bhoga signs attached to Karma.

Hence, the six signs represent the effects of past life.

Earth rotates on its own axis forming north and south poles. This spinning effect causes the self generated energies at the two ends. While this spinning is going on, there are other two sensitive points generated at the intersection of equator and the path of Moon revolving around the earth. These points fall in the direction of northern and southern poles. These two points create self generated pulling effects and these are called Northern Node and Southern Node, which are named in Indian Astrology as Rahu and Ketu.

Being the direction of self generating energies, the North and South directions represent the present self efforts. The signs in Northern directions, Cancer, Scorpio and Pisces represent the Moon trines, signifying the effects of mind. The opposite sign of Cancer being Capricorn, represented by Saturn (the karma), indicates the self efforts and the trines of Capricorn, Taurus and Virgo represent the Bhoga and Buddhi out of present Karma.

Therefore, the signs falling in Eastern and Western directions and the planets in these signs represents "Fate" and the signs falling in Northern and Southern directions and the planets posited in them represents "free will". The figure shown ahead is self explanatory.

The path of destiny is unique formation of planetary configuration for a given Jeeva which will indicate his present karma and the influence of previous karma.

We are concerned with the present life and the influence of past to understand the cosmic plan for a particular karma orientation of a Jeeva on the earth. Nevertheless, we should also consider the evolutionary influence of the world on the Jeeva. The world is evolving day by day with modern methods demanding a different style of living. Chronologically with a specific time interval we have to record the scientific development and its influence on the human society. Astrologically we have to establish the orbital providence with the help of periodic charts. For this purpose we need to do some exercise and experiment with Naadi system to understand the orbital providence based on the planetary

configuration at the beginning of each century. For this purpose let us begin with 14th century considering 1st of January as beginning of every century. Let us take the chart of beginning of every Century at sunrise and assess the development for that century. Based on this universal influence, the human births will also be ordained with appropriate orbital providence.

In Hindu calendar the beginning of the year differs from culture of a particular religion and region. Therefore to study the overall influence of the human and global development it is essential to adhere to a common principle followed. Moreover, the world wide psychological and social development has direct bearing on the Indian development and hence, we have taken the English Calendar year and thereby taken the 1st of January as beginning of every century.

We shall discuss in detail the worldly progress in each century chart and understand how these celestial matrixes have bearing on orientation of human lives born to play their role in each century.

We also take into consideration the Hora lord of each century who plays a vital role in delineations.

Before getting into the universal destiny as a customary requirement, we need to study certain fundamentals of Naadi Astrology. We restrict the information to the essentials of this work. We shall discuss the sign significations and planetary significations in the subsequent chapters. The most essential part of Naadi astrology is the principle on which the delineations are made. We give below the following principles.

1. A planet will get the influence of the sign in which it is posited and views the planets placed in signs 5, 9, 2, 12 and 7th from it. Rahu and Ketu will have influence on the 2nd sign to them.

2. Similarly the planets posited in the above positions will pass on their respective significations to the planet under consideration.
3. The sign and planet that is friendly to the selected planet will give desirable effects.
4. The sign and the planet that is inimical to the selected planet will give undesirable effects.
5. Transit of major planet on any of the planet in a group will prompt fructification of results.
6. A transiting planet in a sign of another planet or in an exalted place of another planet will activate that planet posited anywhere in the zodiac.
7. If a natal planet in a sign having a sign either ahead or behind an exalted or own sign belonging to either the natal or transiting planet, the transiting planet will give the results of the natal planet either in the exalted or own sign cited above, instead of the sign where the natal planet is posited.
8. In timing of events hypothetical transit works more perfectly than the actual transit.
9. A transiting planet will not yield results if encountered by an inimical planet.

There are a number of scholarly enquiries from different quarters on the timing of an event, which was explained in the earlier book *Revelation from Naadi Jyotisha*. In this context, I would like to explain few points which are essential in the study of astrology in general and Naadi astrology in particular. Conventional astrology has a system of Dasha for timing the event. There are five levels of Dasha. Nevertheless, none of the practicing astrologer goes beyond 2nd level that is Bhukti or at the most 3rd level called Antra. Beyond that the sub levels called Sookshma and Prana are not attempted

fearing correctness of accurate birth time. Unless the delineation is from an expert, rarely the results match with Bhukti and Antra period lords. But there are many systems evolved by modern astrologers which do not have sanction from the classical texts, which are half baked with high-end computational or technical jargon which claims to pin down hourly event. However, let us not discard the claim as there are divine souls who could render the events minute by minute. We are deliberately using the word "divine" here because, the whole subject matter of astrology is occult based. In our opinion, unless the higher intelligence bestows upon, no astrologer can decode fate of the person.

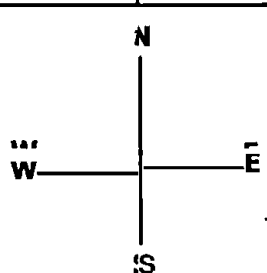

In some of the Naadi texts like Rishi Vakhya, Nandi Naadi and Bhrihu the events are given age wise. In some cases they have given the Hindu year and month for some incidents like death etc. Our works are based on these classical texts and hence we recommend our readers to restrict timing of event on yearly basis.

The timing of events is based on transit of planets. The most important and convincing logic is to move the Jeevakaraka planet Jupiter in each sign which takes approximately 1 year for transit from one sign to the other and then delineate the results. Despite several rules, hypothetical rotation of Jupiter in each sign with relative effect on planets linked to it in each sign (12 year effect of linked planet), according to Naadi principles gives more accurate results than the actual transit position of Jupiter computed by ephemerides or computers. This phenomenon directly prompts to the fact that there is a planetary influence on the mind of astrologer by which the matters are revealed to him. By looking at transits by computation, the mind is set on computation and not linked to the planet. In hypothetical movement the thought process is linked to Jupiter, the zodiac sign and to other planets who are the source to reveal the coded information. For decoding the information, the

preparation by an astrologer is to expertise the signification of planets and signs. However in order to maintain this mental link I have given many subtle rules which are explained in my earlier book *Revelation from Naadi Astrology*. I have repeatedly claimed that this subject is purely metaphysical in nature and hence no amount of technicality or human smartness can frame them into structured formats using divisional mathematics.

In the subsequent paragraphs we will give some essentials of Naadi keeping in view the requirement of this work.

The grouping of planets is done according to directional chart which is explained above. However we reproduce below the zodiac sign indicating the directions.

PISCES NORTH	ARIES EAST	TAURUS SOUTH	GEMINI WEST
AQUARIUS WEST			CANCER NORTH
CAPRI SOUTH			LEO EAST
SAGITT EAST	SCORPIO NORTH	LIBRA WEST	VIRGO SOUTH

Planets falling in each same direction are considered as one group. Planets in each group have to be studied considering the other groups falling in front, rear and opposite direction.

The sign signification plays an important role in deciding the karma of Jeeva karaka. The elemental factors, nature and other significations have to be used with logic to derive the correct interpretations.

We give below the brief planetary significations which are to be used judicially in delineations. We have only given selected significations which are essential in these celestial matrix discussions. We have been repeatedly reminding the readers that every thing on this earth and heavens are covered by the significations of planet. For this purpose we have to go to the root of the object, its nature and qualities to decide the planet representing it. We have given certain major qualities and with these, with proper logic we can identify the planet or planets representing particular object or matter. However we give some of the general significations.

Represent	SUN	Male	Tejo Tatwa Satwik
Character	Royal, Dignified, Prestigious		Father Son
Knowledge Profession Material Experience	Govt or Reputed, Politics Healing-Medicine, Societal, Ranks, Legacy, Bringing to light, Status, - Male progeny East-R. Window		
Disease	Eye-Headache-Heart-Stroke-Diarrhea Loss of appetite-Bile

Disease	Blocks -Growth-abortion- Removal Immobility- Sickness-Arrest-Pains- Suicidal		
IN TRANSIT	Block-De-link-Deject-Quit-Lose-Suffering Endanger to Relatives-Turn spiritual		

The significations are divided into following categories representing elemental factors. Character of Jeevakaraka, Knowledge, Profession, Material Experience, Diseases and the effect of each planet on transit

Apart from above, especially for this work we are giving significations relating to profession for each planet.

SUN	Government related Jobs, IAS Officers, Ruling political personalities, Medical profession, Social Services, Father's Profession, Medical Surgeon, Social service, Recognition for efforts and works and Light related.
MOON	Story writing, Astrology, Salt related, Food Related, Water related, Dairy products, Agriculture and irrigation related, Animal feeds, Liquids and Chemicals, Dry cleaning, Fruit juices, Vegetable shop, grocery shop, Edible oils.

MARS	Uniformed services, Fire services, Civil, Electrical & Mechanical Engineering services, Metal industries, Mining Industries including Gold, Precious stone mining. Mineral industries, Stone crushing & Granite industries, Arms and Ammunitions, Agriculture industries.
MERCURY	Intellectual pursuits, like Teacher, Writer, Mathematics, Accounts, Audit, Commerce, Business, Publisher, Media, Communications, Public transport system, Brokerage, Astrology, Psychology, Gardening, and Sports related.
JUPITER	Priest, Advisory, Legal profession, Noble post in education, Preacher, Religious and endowment related, Life Insurance department, Meditation related.
VENUS	Bank & Finance, Performing arts, Comforts related, Vehicle, Luxury related. Entertainment related, Beauty related, Visual media & Music related. Women related.
RAHU	Foreign related, Secret dealings or professions, Atomic energy, Air related, Poisons Chemical industries, Intoxication related, Explosive related, Shadow, Vehicle related, Unsocial activity related, Menial works, 2 nd hand goods dealing, Black magic and witch craft.
KETU	Handicrafts, Low paid works, Tailoring, Weaving, Spinning Mills, Healing and medicine related, Occult related, Argumentative works, Wire, rope and pipe related, Alternative therapy, Faith healing, Other than these, it may cause obstructions in any other works.

Though the most important in this work is the category relating to Knowledge, profession and Material experience, we have given other significations which are useful in certain peculiar delineations.

There is always link between the knowledge and the character of the person, the background of the person and the circumstances under which the person puts his knowledge to application.

Therefore, the karakatwa of planets have to be studied considering all the aspects to arrive at the right orientation of the Jeevakaraka while performing the karma.

Modifications due to placement in a division of a sign

In this section we would like to introduce another fundamental rule which has been experimented in the class and found to be working in analysing the qualitative modification of a planet being in a particular division in a sign. In traditional astrology there is a chapter specially to assess the effect of a planet in transit which contributes certain strength to a particular sign. This is known as Ashtakavarga. That means 8 divisions of a sign. The order in which it is done for seven planets exactly matches with Hora sequence. The Hora is the planetary hour which commences at Sunrise with the week day lord and at the rate of one hour seven planets are allotted which repeats till the next day Sunrise which matches with the next week day commencing with day lord as first Hora. Thus Sunday first Hora at Sunrise will be **Sun** Hora and in sequence next is **Ven, Mer, Moo, Sat, Jup, Mar**. This will repeat 3 times completing 21 hours and other 3 Hora Sun, Ven, Mer makes it 24 hours and the next Sunrise Monday begins with **Moo** Hora. This can easily be remembered from the Rasi chart below which is divided into two parts and only first parts is used.

Pisces JUP	Aries MAR SUN	Taurus VEN	Gem MER
Aquarius SAT			Cancer MOO

In the above Rasi Chart Aries has two planets Mars the owner and the Sun. Rest of it has the house owners written in each sign. Take any weekday lord and from there at sun rise the first Hora begins and Hora changes every one hour (each sign 1 hour) and after Cancer the same moves to Aquarius. If today is Sunday start from Sun and the next hour is of Venus, followed by Mercury, Moon, Saturn, Jupiter and Mars.

This is Hora sequence and in the same order the Ashtakavarga is computed for seven divisions in a sign and for the eighth division the Lagna is included. The logic of division as per Hora sequence is perfectly right. But the logic behind including Lagna as the last portion and maintaining same sequence for division for each Rasi despite the different lords ruling the Rasi is somewhat unconvincing to adopt the division for the purpose of Naadi Astrology. Moreover, in the Hora sequence there is no placement of Rahu and Ketu. Therefore, for the sake of Naadi a different method is used

to divide the sign into 9 divisions, which is permissible traditionally as being done in the case of Navamsha in traditional texts. By this method each sign is divided into 9 divisions of 3 degrees 20 minutes each and the divisions are allotted commencing from the sign lord himself and then follow the sequence of Hora. Moon being the originator of Rahu and Ketu, we place them immediately after Moon.

These divisions are termed as Graha Rasi Kala. Jupiter or Venus or Saturn i.e. Jeevakaraka or Karma karaka falling in a particular division will have the influence of the lord of that Graha Rasi Kala division and the planets associated with that Graha Rasi Kala. This principle can be extended to other Jeevakaraka and also to other matters pertaining to life. Especially this aspect can be observed to be more effective in transit results. Graha Rasi Kala chart given in page 20.

We have verified application of Graha Rasi Kala in class rooms and after testing number of horoscopes we have included this rule in this book. For example we give horoscope of Mother Theresa and establish the effective usage of this chart.

Example horoscope of Mother Theresa

	Sat@ 13.55	Rah 0.12 Moo 9.33	
	Fig.-1		Ven 17.27
			Sun 10.43 Mar-21
	Ket 0.12 Asc- 19.46		Mer - 7.39 Jup- 21.23

9	Ket 0.12 Asc-19.46	7	Mer -7.39
10		6	Jup -21.23
	8	5	Sun 10.43 Mar-21
	11	2	
			Rah 0.12 Moo 9.33
12		4	Ven 17.27
	1	3	
	Sat@ 13.55		

Karma Karaka Saturn is in the division of Moon indicating the Blood and by retrograde he enters Pisces which has the

last division, Ketu. Saturn is linked to Sun, Dhanwantari (a medical planet), who is in the division of Moon again indicating blood and next to Sun, Mars, who is in Saturn division indicating malfunction of Blood cells. Saturn by retro from Ketu division links to Mercury in Virgo in the division of Rahu indicating spoiled skin and Jupiter the healer in the same sign in the division of Mars indicating healing of blood cells.

Though in Naadi the link of Saturn, Ketu, Sun, Mars, Mercury, Jupiter and Moon indicate the nature of karma, by taking divisions into account the exact karma can be pin pointed. This is an example and we will try them in some of the horoscopes in the coming chapters.

Chapter 3

World Scenario & Modifying Significations

There has been a constant assault on chronological computation of Indian history due to vested religious interests of dogmatic western invaders prioritising their civilization period, which rendered lasting impression that the inhabitants of Bharatha Varsha were in primitive stage and the so called Vedic culture and language is a hyperbole. Further every effort was made at different levels to establish that the Indian astronomical and astrological knowledge was imported from Egypt and Greek culture. Fortunately, the recent scholars from India have done wonderful research and these fallacies were reversed with their intellectual probing of Indian history. The progress and the scientific development during the centuries are nothing but the re-discoveries of the past glorious knowledge of our ancestors. Due to destructive motives of the invaders, valuable information was either smuggled or destroyed. Thanks to the traditional system of passing on information by family or gurukul heritage, by which, we still have sufficient information which can be used to re-glorify the greatness of our Bharatha Varsha. Much before the western world was able to open their eyes, we had definitions of planets, galaxies and stars. For example the sloka of Mangala Graha reads: "***Dharanigharbha sambhootam Vidhyuth Kanthi samaprabham***" which clearly says that Mars has emerged from the earth and it has the electrical brightness. (Not the true translation). But the word electricity in this sloka indicates that the Vidhyuth

(Electricity) was a known factor much before Mangala Graha. Therefore, the significations of planets given by the ancient scholars are applicable at all periods. What we are now doing is only to match the existing signification of planet to the rediscovered object.

However, whenever there is a discovery in the modern science, we have to search for signification of planet from the ancient scripts and apply them at appropriate time. In order to follow this method, we have to know the developments over a period and apply the right significations.

In the first chapter we have mentioned about the century-wise analysis to know the background under which the karma being influenced. In this chapter we make a detailed study of each horoscope of the beginning of century and find out the influence of celestial matrix - that would influence the human karma based on the development and progress that was destined during that century. There is a close link between the mundane progress and the individual backgrounds. The individual matrix of planetary configuration is based on the selective opportunity that is being influenced due to developments.

We shall begin with 14th Century.

Calendar year 1300

Jup 28 Rah 1			
	Fig.-2 January 1, 1300 Friday -Mirzapur (IST) 82.30		
Moo-12			Sat®-3
Sun-29 Mar-28 Mer-13 Ven-11			Ket 2

It is Venus Hora and Venus is with Mercury, Mars & Sun and Saturn is linked from Leo. Saturn is on retrograde and goes to Cancer indicating the reversal of Karma. It is linked to Moon, and Ketu who is linked to the house of applied knowledge. This indicates that up to this period there has been suppression of application of knowledge (Ketu in exalted Mercury house). But from here began the Karma planet going for a change and linked to Ketu, having the aspect of Jupiter - indicating that the Jeeva is churning out to gain the suppressed knowledge. ***This is evident from the Hora lord Venus having Mercury in close conjunction in the House of Jeevakaraka (Sagittarius), but there is Mars, the planet which indicates hardships before the Jeeva tastes success and Links to Mind in the house of service which is again linked to Karma.*** Thus, this century initiated discoveries and progress.

15th Century - Calendar year January 1400

	Ket-16		
Ven-11 Mar-10	Fig.-3 January 1, 1400 Wed -Mirzapur (IST) 82.30		
Sun-27 Sat-16 Mer-6	Moo-15	Rah-16	Jup-24

This period has seen some changes in the field of Naval ships. This is due to the fact that the debilitated Moon is proceeding towards Saturn, Sun and Mercury. There is an exchange of Jupiter and Mercury which makes Moon to meet Jupiter and Saturn. Next, Ketu and Mercury indicate printing and Saturn indicates work and Sun indicates brightness. The printing technology was modernised and this resulted in mass printing of books. This is explained by the exchange of - Jupiter coming to its own place and Mercury going to exalted position. This indicates more number of writers, publishers and/or printing individuals and commuters taking interest in extensive travel during this period. This brings the role of Mercury, Mars and Moon combination.

Incidentally the Hora lord was also Mercury.

16th Century - Calendar Year January - 1500

	Mar-4 Sat-29®		Rah-0.34
Jup-7	Fig.-4 January 1, 1500 Monday -Mirzapur (IST) 82.30		
			Moo-26
Sun-26 Ven-22 Mer-17 Ket-0.34			

The Hora lord was Moon - indicating changes - which is linked to debilitated Saturn, who retrogrades from the clutches of Mars and links to Jupiter for changes. Sun, Mercury, Venus with Ketu having Mars in Aries and Jupiter in Aquarius has given great time for explorations. Moon linking to Sun and Jupiter has resulted in religious and political turmoil. Ketu, Mercury, Venus, Sun and Mars links to Rahu (many persons) have given extraordinary literature and literary works to the world.

This period was favourable for new inventions and literature.

17th Century - Calendar year January 1600

	Fig.-5 January 1, 1600 Friday -Mirzapur (IST) 82.30		Moo-1 Ket-15
Rah-15 Mer-1			Mar®-1 Jup®-4
Sun-23 Ven-1®		Sat-11	

Moon - Ketu combination in Cancer linked to retrograde Jupiter and Mars has resulted in changes in Philosophy. Mercury having Moon and Ketu in opposition and getting Mars and Jupiter by their retro motion with the effect of Sun and Venus has resulted in changes in the field of science. The great scientists, hither to unrecognised, were given due recognition. This is indicated by the exchange of Sun and Jupiter where the Hora lord Venus is with Sun's effect gets the honour of Jupiter.

This was the stepping stone to create opportunities in varied fields.

18th Century - Calendar year January 1700

	Moo-25		
Ket-29 Sat-11	Fig.-6 January 1, 1700 Friday -Mirzapur (IST) 82.30		
Mer-12 Ven-4			Rah-29
Sun-23 Jup-22		Mar-6	

First industrial revolution took place during this period. This is due to Rahu and Moon linking to Mars in the house of Venus, who is establishing link with Saturn and Ketu. Saturn, Ketu and Mars indicate the problems in work. Moon and Rahu indicate revolution and Mars indicates industry. During this period animal labour was replaced by steam engines. Moon indicates water, Mars indicates heat and Rahu indicates the steam. The link of Jupiter and Sun indicates the changing of manual labour to machinery (Jupiter as Jeeva Kaarka dignified by Sun). Saturn in the house of Aquarius with Ketu indicates the invention of Machinery due to connection of Mars in the house of Venus. Venus, the Hora lord, is with Mercury indicating the intelligence being applied to work (being in the sign of self efforts - Moon karma trine). Venus is also hemmed between Jeeva karaka and Karma Karaka. This era started to create demand for skilled persons.

19th Century - Calendar year January 1800

Moo-2	Rah-14		Jup®-5
	Fig.-7 January 1, 1800 Wed-Mirzapur (IST) 82.30		Sat®-19
Sun-21 Mer®-9	Ven-4 Mar-15	Ket-14	

This was an age of machine tools; interchangeable machinery parts and the line of assembling them were invented. This era progressed with industrial production of consumer goods. Saturn linked to Mars and Venus with retrograde Mercury linked to Moon is the combination for machinery and production of consumer goods. Machinery Parts assembly is indicated by unification of Mars and Venus in the house of Mars linked by retrograde Jupiter from the house of Venus. The exchange of Jupiter and Mercury is the utility factor of produced consumer goods.

The exchange of Hora lord Mercury from the house of Jeeva karaka to house of intelligence is an indication to the demand for intelligent persons.

20th Century - Calendar year January 1900

		Ket-28	
	Fig.-8 January 1, 1900 Wed-Mirzapur (IST) 82.30		
Ven-16			
Mar-23 Sun-19 Moo-14 Sat-7	Jup-10 Rah-28 Mer-28		

Conjunction of Rahu and Mercury in the house of Mars having Jupiter in the axis of Ketu and Rahu and the Hora lord Moon with Saturn, Sun and Mars situated in 2nd house to Jupiter and lastly, Venus in the House of Saturn is a sure indication of new inventions, changes and progress in the field of technology. No exchange of planets, no retrogression of planets and Venus in the house of service directly indicate an upswing in yearning for luxuries.

None of the earlier centuries witnessed such great progress as this century under review particularly in the field of Science, technology and inventions. This century began with airplanes, automobiles, radio, computers, cell phones, spaceships, wireless, internet and many more.

1) Jupiter+Rahu+Mercury= Many intelligent persons multiple intellectual efforts (in the house of Mars) +

2) Sat+Moon+Sun+Mars=Various industrial products +

3) Venus in Capricorn = Luxury products +

4) Ketu in Venus house = comfort utility.

21st Century –Calendar year January 2000

	Jup®-3 Sat®-18

Ket-12			
Sun-17 Mer-9	Ven-9	Moo-17	

Hora lord Saturn is along with Jupiter and links Sun and Mercury. Both retrograde going to Pisces, a house of Jupiter and linked to Venus. The success of intelligence applied with efficient work to get luxurious comforts from Venus and making changes wherever necessary due to effect of Moon. The exchange of Mars and Saturn indicating the technological changes with the effect of Mercury and Sun is evident. More opportunities were created, more educational avenues were opened, and as Saturn being Hora lord given more work opportunities and with Moon - opened many more global opportunities.

Thus and in this way there were environmental changes from time to time which have created demands for growth and accordingly the birth patterns were also changed. A

person born with a particular pattern of planetary configuration during 13th century might not have had the greater opportunity in comparison with a person born with similar configuration during 19th or 20th century.

Therefore, the delineations of a personal horoscope have to be judged keeping in view the effect and impact of the mundane influence. We must understand the environment under which a person is born, his family background and also the influence of the society on him which shall have the bearing on his self efforts before we proceed with the analysis of horoscopes.

Briefly we have given the overall global changes during these centuries. There had been great changes in religious and cultural aspects too. There were changes in culture, rituals, family traditions and the psychological approach. All these factors are to be considered. Without upgrading these influences and sticking only to the rules of astrology does not give a proper delineation power.

In Andhra, the Brahmins are grouped as Vaidikas and Niyogis. In Karnataka, Madhvas and Smartas, in Tamilnadu Iyers and Iyengars, in Kerala Namboodiris, Pottis and Puspakas are Brahmins. In Maharashtra there are five categories of Brahmins and in Gujarat there are eight categories of Brahmins.

There are many other caste in Andhra Pradesh such as Reddy, Khamma, Velama Choudhry and many more. Similarly in Karnataka there are lingayaths, Goudas etc., In Tamilnadu Chettair, Nadar etc., In Kerala there are Nairs and Menons.

In almost all Indian states we have different caste and communities, each having and following certain set of their own principles. Centuries back, we have witnessed that a Vaishnava Brahmin would neither have nor admit a Shaiva Brahmin in marriage alliance. Besides, among the same

community or caste, if they are born in the same lineage of Rishis they would reject as "Sagotra" (same Rishi tradition) which is a traditional rule incorporated in astrological match making. Even to this date some of them follow the rituals strictly but majority have changed, the culture has changed or deviated from the traditions.

During that period a love marriage was a remote and rare phenomenon. There were instances where the boy met the girl only after the marriage. But things have changed slowly, you find number of love marriages. The caste differences have reduced. Even the families have adapted to modern cultures.

Lot of importance is being given to the economical well being of the married couple rather than to the traditional cultural values. The present scenario is totally different. Therefore, the astrological application also needs changes in marriage match making.

Educational systems have changed, working environment has changed. For the present generation the mornings have changed to the times of dinner, sleeping or bed time and the active life begins at night. This socio economic time factor has given no scope to maintain the timing of traditional ritualistic life.

The relaxation is limited to weekends only instead of every day or on daily basis. The family gathering has shifted from home to pubs, clubs and resorts leaving no time to maintain the cultural heritage.

We need to amend the cultural prescription to suit the present generation. Time factor needs consideration and modern thought process has to be incorporated to maintain the cultural values. Similarly the astrological remedial measures have to be modified to suit the time factor of the present generation.

There is a need to reconstruct the philosophical approach in order to maintain our heritage. We need to incorporate the godly - almighty factor in the modern concept.

These changes are due to celestial matrix and it is the cosmic plan to put the human race to test. This is the time to stand up and gear up to re evaluate our cultural heritage and find the modern ways and means to update ourselves and match with the speed of present generation and support them with appropriate ideology.

This responsibility lies with the Astrologers, occultists, priests and preachers. If we goad the present generation with the hectic ritualistic restrictions, they develop aversion to the basic cultural values and they may resort to destructive habitual life.

We had to discuss all these, in order to precaution the astrologers to study the horoscopes, keeping in view the conditions that are influencing the present generation and then upgrade themselves with the modern methods to prescribe proper applicable solutions.

Every change in mundane matter will have direct bearing on the individuals. This is the point which we would like to stress upon. The significations of planets signs and houses etc., are to be reconstructed duly keeping in view - the changing world. There is a need to work on this and arrive at significations to suit the present generation. We should not only work on modifying significations but find a formula which can be used to fit in for any such future development.

Note: We have not used Lahari Ayanamsha for the horoscopes.

Chapter - 4

Changes in Zodiac Elements

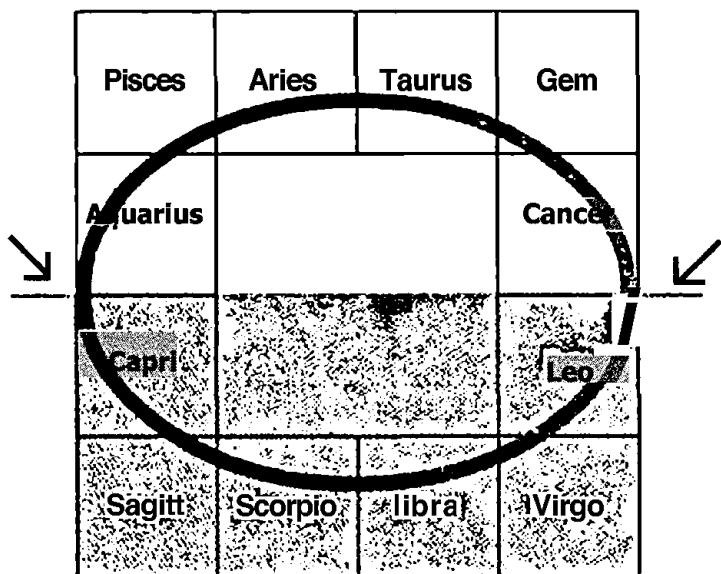

For the purpose of this work, we have modified certain significations of zodiac signs within its permissible limits of classical texts. The concept we have used here is based on the traditional texts. We have modified the words to suit our requirement in Naadi astrology. There are many significations given in traditional books. Apart from this in Prashna-Marga a treatise on Horary Astrology from Kerala has also assigned numbers to each Rashi which can be used in many ways which can be used in determining quantitative delineation of various aspects.

The word "Srishti" means, in general, creation - giving birth, produce and manufacture - it even means this world. "Sthiti" means stay, position, status and Proprietary. "Laya" means rhythm, melt, dissolving or make things in order. Dhatu, in general, is known as element or metal. At the deeper sense, it is the origin of creation or something that has caused the beginning. Moola is root. In other words it indicates the basic resource. Jeeva is living matter, the essence which is being felt - being alive.

There is little deviation with regard to assignment of Tatwa to signs. We have considered the tatwa based on the orbits.

In our earlier book, "Revelation from Naadi Jyotisha", we have clearly explained about the relationship of zodiac with the planetary orbits. Saturn is the last planet with its orbits forming the two signs of Aquarius and Capricorn. The

Saturn is of Vayu tatwa and therefore these two signs are given Vayu tatwa. Next the orbit of Jupiter making two zodiac signs Pisces and Sagittarius. Jupiter is Akasha tatwa and hence both these signs are Akasha tatwa. The Mars orbit makes Aries and Scorpio in the zodiac and therefore, the Agni tatwa goes to them. Orbit of Venus makes two signs Taurus and Libra, so Venus is given Jala Tatwa hence both the signs represent Jala tatwa. Orbit of Mercury represents Gemini and Virgo which is attributed the Prithvi tatwa of Mercury. Moon is Jala Tatwa so their orbital sign of Zodiac Cancer is Jala tatwa. The orbit of earth which is considered as Sun path is taken as Leo sign and Agni tatwa of Sun is attributed to Leo. This we show in a figure of south Indian zodiac, where the zodiac belt is superimposed.

Saturn's visible half is Aquarius and invisible half is Capricorn. Similarly Jupiter's path visible half is Pisces & invisible half is Sagittarius, visible path of Mars is Aries and invisible is Scorpio, Taurus becomes visible half of Venus, and Libra becomes invisible half. Mercury path visible is Gemini

invisible is Virgo. Leo is Sun's path and in the same path around the Earth, Moon path is there which reflects the light of Sun. Cancer is allotted to it. The twelve divisions of the zodiac though inter-linked to planetary orbits, their individual identification is based on group of stars located far away from the orbits sub-merging the distance between the orbits. Therefore, in astrology, the panoramic view of zodiac signs are sequentially considered for any given reference point.

According to this theory, the signs of Aries and Scorpio will get Agni tatwa. The signs of Taurus and Libra get Jala tatwa. Signs - Gemini and Virgo will get Prithvi tatwa. The sign Cancer will get Jala tatwa. The sign Leo will get Agni tatwa. The Signs of Pisces and Sagittarius will get Akasha tatwa. The signs of Saturn, Capricorn and Aquarius will get Vayu tatwa.

We will establish a metaphysical support to this tatwa theory. We shall begin with Saturn the planet of karma as propounded in Naadi system.

Vayu tatwa is assigned to Saturn and his two signs. Both signs represent karma one represents past and other represents present as per the Sun karma trine and Moon karma trine. Vayu is of different types as cited below:

Pranopana vynodana Samana

Prana	It provides the basic energy that drives us in life.
Apana	Elimination of carbon dioxide through the breath and it also helps in elimination of negative emotional thought process. It develops the immune systems at all levels. If this is not regulated negative effects are experienced in body resulting in mental disturbances prompting undesirable acts through the influence of thought.

Vyana	It is a circulatory process which moves the essentials to all parts of the body and even at certain stage will help in communicating or transporting thought process at different levels. It can also be positive or negative.
Udana	It governs growth of the body, speech, effort, zeal and will which can either positively or negatively disposed. The regulatory process will prompt towards better acts in life.
Samana	It is a balancing force which acts and supports Prana or life force with an effect of balancing all the experiences either physical or emotional.

Apana, Vyana and Udana needs total control because they are tend to cause negative effects resulting in not only health problems but also effect the free will to do right karma during this birth.

Prana is the subtle process of karma. Controlling Apana, Vyana & Udana and regulating it through Samana, the karma is balanced.

Therefore, Pranayama is the tool granted by the great Rishis through which we can regulate the karma effects of past, present and future.

This art of Pranayama is major process in Sandhya Vandana - a process which will be initiated at the very young age of 8 years in the Brahmin community. Baring the ritualistic activities involved in Sandhya Vandana the Pranayama prescribed in this process is again from the yoga sutra and therefore, except for the ritualistic proprietary the Pranayama is open to all human beings irrespective of caste, creed and gender. The main ingredient of Sandhya Vandana is Pranayama and Gayatri Japa. We are not discussing here about this process but we are concerned with the Vayu tatwa

allotted to Saturn. Vayu is Air and by breathing all living matter on this earth relates to Saturn i.e. Vayu tatwa. We are breathing everyday but we are not conscious about the breathing process. We need to regulate the breathing process and save the number of breath and also maintain deep breath process to maintain health. The air we breathe is also called Prana. Regulating this Prana Shakti is Pranayama.

The idea behind this is to train the mind and body and control the Prana and lead a healthy and powerful life by guiding others to salvation.

However, the Pranayama and the reciting of mantra is the main process. After understanding the main principles behind regulating the breath every person can do this process and it does not call for any expert guidance. The caution is to do every step of the process with ease and never get strained. The time factor will automatically improve by regular practice and never get your self compared with other seniors.

Naadi shodhana:- Will help in identifying the points of toxin deposits.

Bhaya Kumbhaka:- Marks these points and direct them in a sequence.

Bastrika:- Will expel these toxins from the body.

Antar Kumbhaka:- Will fill the Prana Shakti in the areas where toxins were removed and circulate it throughout the body.

Yoga Nidra:- Will take up the corrective steps and balances the Prana Shakti in the entire body including brain.

These are the five essentials of Pranayama to control the Prana, Apana, Vyana, Udana and Samana.

Before commencing this breathing process we need to warm up the body and relax the junctions in the body. For

this purpose few Yogasanas are to be performed and then start the Pranayama.

To regulate:

Apana Vayu - Pavana Muktasana, Ardha Matsyendrasana are prescribed

Vyana, = Padmasana, Vajrasana

Udana = Sarvangasana, Halasana, Dhanur asana

This is about Vayu tatwa of Saturn representing Karma in Naadi Astrology. By adopting this process we will be clearing our prarabdha karma thereby preparing for righteous Agami karma. The Saturn in the horoscope will give details about the capacity to do yoga and level of Sadhana.

For the above yoga Sadhana and to clear Karma, the other elements that are to be controlled are Agni, Prithvi and Jala, who are destructive elements for Sadhana if not regulated. If controlled and balanced, the Sadhana will get the path of Akasha tatwa which is a path of Jeeva where the cleared karma will release the Jeeva from the cycles of birth and death.

Agni tatwa is divided into Tejagni, Tapagni, Krodhagni and Kamagni

Tejagni and Tapagni are represented by Sun. Krodhagni and Kamagni are represented by Mars. Tejagni and Tapagni are both internal and external. Krodhagni and Kamagni are internal. The later pair is dangerous to Sadhana. This can be studied with the disposition of Sun and Mars in the horoscope.

Prithvi tatwa is divided into three that is **holding or to contain, absorbing and to undergo**. These are represented by Mercury the containing or holding is of knowledge. Absorbing is learning. Undergo is to experience.

Next is Jala tatwa is flow of emotion, reaction, love, change or motion. This is represented by Moon.

Therefore, regulating heat, absorbing knowledge and emotion are essential to Sadhana. These can be studied in the horoscope.

The Akasha tatwa is represented by Jeeva karaka Guru and therefore, his path to merge in the Akasha should be made clear by practicing Yoga Sadhana.

Similar to magnetic theory, a Graha (planet) transfers its qualities to the orbits during its movement in the orbit. Therefore, it is logical to assign the tatwa of planets to their orbits. Planets holding lordships of two signs may have variance in the quality of tatwa transferred to orbit division of two signs.

Having established, both astronomically and metaphysically, the tatwa nature and its application to zodiac, we have modified suitably the tatwa attribution to zodiac signs for the purpose of Naadi as shown in the next chapter. We use this theory only in Naadi and it is not our contention of change what is said in classical texts.

Chapter -5

Modified Zodiac Significations

Mesha

Sanskrit	English	Sanskrit	English

		Lobha	Greedy

Chapter 6

Orbital Relationship

Cosmic harmony is represented by the order of natural zodiac signs. The planetary orbits in their sequence maintain the balance of entire universe in general and our earth in particular. In other words, if planets are in their own signs, they will enhance the favourable factor to each other. With this logic the following rules are framed for Naadi Astrology.

Two inimical planets in their natural orbital disposition do not attribute negativity to their results to each other. We explain them in the charts below.

JUPITER		VEN	
	Fig. 10 3, 11 Position to each other does not give enmity		
JUPITER		VEN	

JUPITER			
	Fig. 11 5th position of Moon to Jupiter will not give bad character.		MOO
JUPITER			

SAT	Fig. 12 7th to Saturn Moon and Sun will not trouble.		MOO
SAT			SUN

		VEN	
	Fig. 13 3, 11 Position of Venus to Sun and Moon does not give bad effects		MOO
			SUN
		VEN	

	MAR		MER
	Fig. 14 3, 11 Position of Mars and Mercury does not exhibit enmity		
	MAR		MER

	MAR		
SAT	Fig. 15 3, 11 Position of Mars & Saturn does not give enemy effect.		
SAT			
	MAR		

These positions are their permanent orbital position by which the creation is under harmony. Naturally when these bodies transit in these position it becomes harmonious positions therefore negative significations need not be attributed in combination.

Division of zodiac

We have already given the zodiac division in accordance with hora sequence including Rahu and Ketu which makes it equivalent to Navamsha division. The hora divisions of signs are satisfactorily indicating some of the significations either through karma or through Jeeva. However, the significations we are attributing to these hora divisions are planetary significations which are dynamic in nature. In fact we have to derive the static space significations to these hora divisions. We are experimenting on it and we shall provide the information possibly in our next project. However we furnish some of the steps which are adopted in deriving the space

We have derived the Graha rasi kala based on the sequence of hora and appropriately included Rahu and Ketu basing on astronomical order of orbits. This division automatically fits into another classically established space division i.e. Navamsha. In the classical texts though there are results of planets posited in particular Navamsha, no independent qualities are attributed to each division in a sign. Nevertheless the amshas are named after either Rasi or the lord Of the Rasi. In Aries the first division belongs to Aries itself and the lord of this amsha happens to be Mars. The 2nd division belongs to Taurus and the lord is Venus. The sign qualities and the significations of lords are only available information for this space division. We strongly feel that there must be some clue to get at the right space division for Navamsha as in the case of Drekkana another classical division of sign where in each sign is divided into 3 space factors. In classical text we find unique space significations and body part descriptions for each Drekkana. Ironically three Navamsha divisions make one Drekkana division as shown below.

Aries									Taurus									Gemini																	
Drekkana									Drekkana									Drekkana																	
Aries			Leo			Sagitt			Taurus			Virgo			Capri			Gemini			Libra			Aqua											
Ari	Tal	Ge	Cni	Lel	Vi	Lil	Sci	Sg	Cpl	Aql	Pi	Ari	Tal	Ge	Cni	Lel	Vi	Lil	Sci	Sg	Cpl	Aql	Pi	Ari	Tal	Ge									
Navamsha									Navamsha									Navamsha																	
3	6	10	13	16	20	23	26	30	3	6	10	13	16	20	23	26	30	3	6	10	13	16	20	23	26	30									
20	40	0	20	40	0	20	40	0	20	40	0	20	40	0	20	40	0	20	40	0	20	40	0	20	40	0									
																											Can								
																											Drekkana								
																											Cancer			Scorp			Pisces		
																											Cni	Lel	Vi	Lil	Sc	Sg	Cpl	Aql	Pi
Navamsha																																			
3	6	10	13	16	20	23	26	30																											
20	40	0	20	40	0	20	40	0																											

Unique space significaitons and body parts are attributed to each Drekkana and it is logical to think that there must be subtle details available for Navamsha. This is the point on which we are working. There are 150 divisoins of Naadi where in each division has some coded name. These coded name must have some meaning. In some of the texts effectiv results of these divisions are explained but the key factors behind the meaning of these divisions are absent. We are stressing on the point of space division because all the karma deails are in the space. Our graeat Rishis were masters of astronomy and application of its technicalities to karma asepect. They were empowered with extrodinary perceptive powers and nonetheless we are in the age of science and development where logical thinking has no limits. But within the sanctioned boundries we must reach for the secrets and use them for human welfare.

We have assimilated the significations of Drekkana from the classical texts and extracted usable deeper meanings (subject to future changes) for the purpose of Naadi.

Aries:

1st Drekkana

Male, Malicious but pretending to be kind and protective
Aggressive and fearsome

2nd Drekkana

Female, four wheelers or 4 legged animals, spendthrift,
Lust and Luxury, steadfast

3rd Drekkana

Male, melodious arts & artistic skills, sadistic nature,
religiously ritualistic, Trial and error, throw blame on others.

Taurus:

1st Drekkana

- Female, Greedy, Food loving, Less of dress more of ornaments.

2nd Drekkana

Male, Transport, House, Arts, producing and liking food.

3rd Drekkana

Male, Unsettled mind, bulky, Slow and slogging movement.

Gemini:

1st Drekkana

Female, Barren, Pricking at other, trapping others in net for wealth.

2nd Drekkana

Female, Flying in the Air, Bold, Peace loving, Protective Loving children, desires for wealth and fun.

3rd Drekkana

Male, likes gems and ornaments, performing arts, protective.

Cancer:

1st Drekkana

Male, Moving, Fat, Likes scented materials, Healer.

2nd Drekkana

Female, Revengeful, Virile, Thrusts their opinion on others.

3rd Drekkana

Masculine, Family oriented, Travel, Stings poison.

Leo:**1st Drekkana**

Male, Works hard, feels high, flares up, no respect for elders, careless attitude.

2nd Drekkana

Female, Seeks fame but does not yield to others. Bold.

3rd Drekkana

Male, Hard work, clever, active but restless.

Virgo:**1st Drekkana**

Female, Parental affinity, hidden grace, Fashionable, desire for wealth.

2nd Drekkana

Female, Partnership, Unification, Communicative, tolerance.

3rd Drekkana

Female, Religious, hidden wealth, desire to grow, belief in God.

Libra:**1st Drekkana**

Male, Thinking of Business and profits.

2nd Drekkana

Male, high thinking, family oriented, greedy and ready to grab.

3rd Drekkana

Male, Efforts, Vehicles, Rules over weak, gathers wealth.

Scorpio:**1st Drekkana**

Female, Poisonous, Can do any thing for self benefits. Traps with attraction.

2nd Drekkana

Female, Pretending faithful, uses all means to convince. Greedy.

3rd Drekkana

Drives enemies away, Protects the pious.

Sagittarius:**1st Drekkana**

Male - Religious protection, Righteousness.

2nd Drekkana

Female, Search for precious things. Steadfast.

3rd Drekkana

Male, Reputed places, Status.

Capricorn:**1st Drekkana**

Masculine, Laborious, worried, committed.

2nd Drekkana

Female, Artistic, desire for feast and Jewellery.

3rd Drekkana

Male, Calculative, Protective, Wealth.

Aquarius:**1st Drekkana**

Male, Airy thoughts, Self content.

2nd Drekkana

Female, Careless about self but gathers all things.

3rd Drekkana

Male, Desires to be on top, Does not hear to others.
Travels.

Pisces:**1st Drekkana**

Male, Ritualistic, Reliving, Searching nature.

2nd Drekkana

Female, Fickleness, Likes pampering, falls for love.

3rd Drekkana

Duality, Envious, Troubled, Loss, and Cry for help.

We have given only hints about the significations of Drekkana. Lot more is to be researched, verified. Information about the body parts which is denoted by Drekkana used in identification of disease's is a seperate subject and shall be dealt in our next project on Medical astrology.

The above information is subject to practical application and not the ultimate significations. We are providing this information for the readers for their further application and research.

Chapter 7

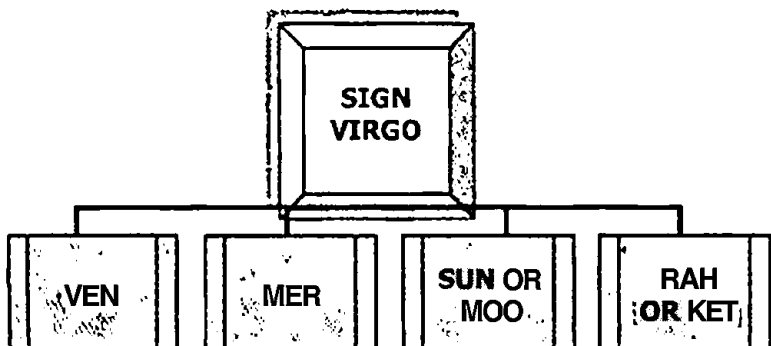

Orbital Providence

We have seen in the earlier chapters how the changes have taken up in accordance with the planetary configuration in each century. Similarly, there are certain planetary configurations which will decide upon the orientation of life with regard to karma of an individual. The purpose of birth will be determined by the planetary combination in a birth chart. A vital role is being played by signs. There are only 12 signs and 9 planets available for combinations. But there are varied matters that are related to the life. We need to distinguish and analyse different matters of life basing on these limited twelve signs and nine planets only. Therefore, we have to consider a particular rule in a different angle. In most of the cases the sign participation as per the rule will match. In order to signify other matters of life, some time planets are aligned differently and the direct participation of sign may not be possible. Therefore, even if the sign is influenced, the effects of the signs are to be considered. At times even if the sign is not participating directly, the lord will pass on the sign significations and invariably the sign lord links his own sign.

For, this purpose we have taken up the birth charts of individuals from different walks of life and explained them in detail. We have the following categories for a study:

- **Scientists**
- **Politicians**
- **Defence personnel**
- **Insurance Personnel**
- **Engineers**
- **Industrialists**
- **Writers**
- **Legal persons**
- **IAS officers**
- **Doctors**
- **Occultists**
- **Extraordinary talent**

Scientists

In science, knowledge is applied and therefore, one of the Mercury sign Virgo being applied science must participate. The planet of higher intelligence, Venus must participate. Mercury is a planet of intelligence which is essential. To bring the applied intelligence to light Sun must be linked. Moon is mind. The technicality of the matter is represented by Mars. Rahu and Ketu are subject modifiers. One indicates vastness or space related and the other indicates deep rooted.

Let us go through example horoscopes of Scientists, establishing destiny direction.

Fig. 16: A scientist with research subject on Light

.	Male born on 7-11-1888		RAH-01 SAT-28
KET-01			
MOO-08 MAR-19	JUP -18 VEN 24	MER®- 10 SUN-23 ←→	

By the participation of sign Virgo the first condition is satisfied by retrograde Mercury going to Virgo from Libra. Mercury linked to Sun in Libra and having Venus and Jupiter in 2nd satisfies the involvement of Sun and Venus. In Sagittarius Moon is linked to Venus. From Venus, Saturn is in 9th in Cancer. Saturn is having retro Mercury in 3rd. Saturn is with Rahu and Mercury, by retrograde, links to Ketu.

All the conditions mentioned above for a scientist are satisfied. Mercury, the planet of intelligence is linked to Sun carrying the effect of Sun to applied intelligence and linking to Ketu, the deep rooted knowledge of Sun. Sun is light and therefore, the subject of research was light. **Saturn in Mercury kala and Mercury is with Sun.**

Fig. 17: Scientist - Not only scientist but also a Visionary with Industrial set up

MAR-03 SAT®-26		MOO-02 RAH-15	
	Male born on 30-10-1909		
	<u>Analysis on Jan 16, 2009 18:05 Friday- Hora lord Jupiter</u>		
	KET-15 VEN-28	SUN-14	JUP-11 MER-25

The link of Rahu and Moon to Mercury in applied intelligence house indicates the matter relating to Atomic energy. Mercury is having Sun and Venus in its succeeding signs. Saturn is linked to Mars indicating the technical nature of work. Mercury indicates the business and Jupiter having Sun in the next sign indicates success in business. Rahu and Moon linked to Jupiter and Mercury indicates the business/commercial vision. No doubt this great scientist has established industrial units relating to the subject of research. Saturn is in Ketu kala and by retro goes to Rahu kala Ketu is with Venus and Rahu is with Moon.

Note: Let us verify few more of horoscopes of scientists to establish the planets involved as per the Destiny directions. The method to use the other significations to indicate the subject matter and the activities of the scientist is also given for better understanding of the topic.

Fig. 18: Scientist - Plants and Metals also have feeling

		JUP®-26	
RAH-12	Male born on 30-11-1858 <i>Analysis on Jan 23 2009 18:40 Friday Hora lord Jupiter</i>		SAT®-20.24
MAR-21			KET-12
MER-03 VEN®-7	SUN 16		MOO-1608

Moon establishes link to Mars and Mars in turn links to Saturn. Mars represents metals and Moon the feeling. Moon links to Jupiter and Jupiter by retrograde goes to Aries and links to Mercury. Ketu indicates root Mercury indicates plant. Mercury is linked to Ketu from the house of Jeevakaraka. Venus gets exchanged with Jupiter and Jupiter now gets conjunction with Mercury, being Jeeva karaka, and with the influence of Moon, goes to Atma karaka, the Sun. Obviously the research subject was to establish the plants and metals too have feelings. Sign Virgo, Sun, Mercury, Venus, Ketu and Moon - have participated in this context. Saturn is in Sun kala linking Jupiter and Jupiter is linked to Moon and by retro, Venus is linked to Mercury.

Fig. 19: Scientist - Astrophysics research

RAH-27		JUP®-9	
	Male born on 06-10-1893		
	<i>Analysis on Jan 24 2009 9:00 Sat- Hora Lord Mars</i>		MOO-5
	VEN-0.23	MER-02	MAR-10 SUN-21 SAT-23 KET-27

Hora not seen but - While starting this - There was Ganapathi Pooja going on in our lower flat. Ganapathi represented by Ketu and Ketu is in applied intelligence house.

Applied intelligence has Sun, Mars and Saturn and they are in the axis of Rahu and Ketu. Jupiter is linked to Venus. Mercury is in 2nd house to Virgo.

Rahu is an Atomic planet and Venus the planet of higher knowledge from the technical house is linked to Rahu. Venus is also linked to Jupiter and Jupiter in turn is linked to Mars, Sun, Saturn and Ketu to which Mercury and Venus fall in the subsequent houses. This indicates the atomic research work. Saturn is in Mars kala and Mars is in applied intelligence house.

Fig. 20: Scientist - Atomic particles named after him

RAH-23	JUP®-29		
VEN-3	Male born on 01-1-1894 <i>Analysis on Jan 24 2009 9:57 Sat- Hora lord Sun</i>		
MER-02 SUN-18	MAR-8	SAT-02 MOO-12	KET-23

Continued with reference to Ketu as in the previous chart, again Ketu is in Virgo.

Jupiter, by retro, is linked to Rahu and in turn is linked to Mars which indicates Atomic science. Jupiter is linked to Mercury and Sun from his direct motion. Saturn and Moon are also linked to Jupiter. Saturn also gets exchanged with Venus and goes to his own house having Jupiter by retro in his own house. Ketu indicates particle - Rahu and Mars indicate Atomic technicality. Applied intelligence is towards the Atomic particle. Jupiter is self, Saturn is Karma of self and Ketu is title or name. The research out come naturally is the atomic particle which is named after him. Name factor Sun is in Moon Kala and Moon is with Saturn indicating the work.

Fig. 21: Scientist - Research on various matters of Physics

	MOO-9 SAT®-11 RAH-27		
	Male born on 19-10-1910 Analysis on Jan 24 2009 12:15 Sat- Hora lord Mer		
		SUN-2 JUP-2 KET-27	MER-17 VEN-22 MAR-25

Astonishingly, Venus, Sun and Saturn are all debilitated. Only Mercury is exalted. In spite of debilitated planets, the significations relating to these planets were positively exemplified in his life. In Naadi the debilitation of a planet will only talk about the conditions of the relatives represented by the respective planets. The debilitation will have a different meaning. Sun debilitated, that it means the hidden matter relating to Sun which the scientist has to discover, that is stellar structure. Ketu represents - small, Sun - a Star, Jupiter - bringing to life and Rahu + Saturn are linked to Mars - indicates electrons Venus(white)debilitated indicates the matter of white dwarf which means a small star composed

of mostly electron-degenerate. The Saturn is retrograde and is linked to Mars, Mercury and Venus, the quick moving planets, indicates stellar dynamics. The Moon's involvement indicates hydrodynamics and the influence of Ketu indicate's the magnetic matter or hydro magnetic stability factors. Saturn a dark planet debilitated and by retro going to the house of Moksha or place of unknown indicates the black holes.

The linking house of applied intelligence has Mercury, Venus and Mars which indicate high caliber expertise/intelligence in research matters.

This great scientist has also a noble prize to his credit due to combination of SUN+KETU+JUPITER (Dhwaja keerti Jeeva). **Saturn is in Mercury kala and by retro goes to Venus. Both Mercury and Venus are in applied intelligence house.**

Note: The principle, to become a scientist, is applied without any hypothesis and the relative matters as explained above are more a postmortem as to a logical application. Undoubtedly, the logic differs from person to person and there is no harm in deriving as many significations as possible to a planet, as long as they can be applied repetitively. Only by such experiments we can derive the new significations to planets. This work is intended to provide a lead so as to provoke/activate the intellectual mind enabling it to do further research on these matters and bring out advanced theories in Naadi system.

Fig. 22: Scientist - Space research & Application for Socio-economic developments

		KET-08	
MOO-1	Male born on 12-8-1919		MAR-.05 JUP-9 SUN-26
			MER®-2 SAT-7
	RAH-08		VEN 2

Mars, Sun, Rahu + Jupiter = Space matter. Mercury is linked to Saturn and the space matter = Commerce orientation. Venus from applied intelligence and also house of commerce (debilitated) and Ketu blocked are supported by the research work in space matter and commercial orientation. Hailing from a business family (Sun + Jup + Mer [R]) he devised India's space programme and defined the role of scientists and scientific institutions. He was the man who developed and launched rockets. He was determined to use every aspect of science and technology which lead to satellite-based remote sensing of natural resources, telecommunication and TV development. He was also the visionary of business prospects through scientific development. **Saturn is in Mercury kala and Mercury in the chart by retro links Rahu (Space matter).**

Fig. 23: Scientist - Nuclear science-Heavy water reactor development

	MOO-12	MAR®-28	SAT®-3
	Male born on 11-11-1943		RAH-18
KET-18			JUP-2
		SUN-25 MER-25	VEN-08

Venus from the house of applied science, linked to Ketu with Sun and Mercury in the 2nd house to Venus, having Moon link. By exchange Mercury goes to his own house and Venus comes to Libra, establishing link with Moon. Both Mercury and Venus established link with Moon and Mars. Mars gets the link of Saturn, who is approached by Rahu from the house of Moon. Saturn, by retro, is linked to Mars. This chain link establishes the matter as nuclear science. Saturn and Mars, by retro, are linked to Moon indicating heavy water. Mars is kriya and Ketu is pratibandha, which can be construed as reactor. The research work is on heavy water reactor. Sun and Mercury indicate the bringing of knowledge to light. Saturn, Mercury and debilitated Sun indicate the karma connection to research departments of government. Saturn is Mercury kala and by retro goes to Sun kala. Both Mercury and Sun in the chart are linking Moon (Water).

Fig. 24: Scientist - Missile Man rose to be the first citizen of India

RAH-12			
	Male born on 15-10-1931		JUP-25
SAT-24	MOO-20	VEN-8 MAR-26	KET-13 MER-26 SUN-28

Ketu is tail, Mercury is intelligence. Sun, Mars and Venus indicate high level technology. Moon and Rahu indicate the Atomic moving energy. This native is called as Missile Man of India. Ketu and Sun are attributed to titles and awards. He has to his credit many awards in the filed of scientific research. He rose to the position of the President of the nation due to his high level intelligence which, by his research, has put the nation on the path of progress. The Saturn is in the sign of Jupiter, which is backed by almost all the planets. The participation of Sun in the house of applied intelligence/and is linked to Saturn through chain of planets ahead, is the reason for his becoming president of India. Jupiter, Rahu and Moon indicate his back ground - full of struggle. Jupiter, Rahu and Moon also indicate in the artistic matters. He was also a writer, and music lover. **Saturn is in Ketu kala and Ketu in the chart is in the house of applied intelligence (missile).**

Fig. 25: Scientist - Mathematician par excellence

MOO-07			
	Male born on 22-12-1887 <i>2nd Feb 2009</i> <i>Monday - 8.10</i> <i>Hora-Saturn</i>		SAT®-13 RAH-18
KET-18			
SUN-08	JUP-03 MER-23	VEN-22	MAR-16

Applied intelligence has Mars, linked to Ketu, indicating the deeper calculative abilities which indicate mathematical ingenuity. He invented an asymptotic formula $p(n)$. It is sometimes called the number of unrestricted partitions, and is implemented in *Mathematics* as Partitions $P[n]$ or Number of Partitions $[n]$. Saturn, Rahu and Moon indicate the foreign links. According to Naadi, whenever there is a link to Saturn and Moon there will be health problems. This great mathematician has suffered due to ill health. **Saturn is in Saturn kala and in Chart, Saturn is linked to Ketu and Mars.**

Fig. 26: Scientist - Magneto-Chemistry

RAH-18		JUP-01	
VEN®-3 SUN-10 MER-27	Male born on 21-02-1894		
			MOO-22
MAR-13		SAT®-3	KET-18

Magneto chemistry is the study of the magnetic properties of materials. "Magnetic Properties" mean not only bar magnet but also the study of synthesis, analysis and understanding, whether the material will be attracted or repelled by a magnet.

House of applied intelligence is having Ketu a planet of repulsion and is directly linked to Jupiter a planet of attraction. Saturn is linked to Ketu Venus, Sun and Mercury. Venus establishes link, by retro, with Mars and Moon. Venus gets exchanged with Saturn and goes to the 2nd house to Ketu and being on retro joins Ketu. There is an action of repulsion and attraction in the exchange itself. This is as far as research work on Magneto chemistry is concerned. Saturn's link with many planets, including Sun, indicates various government establishments relating to research. Combination of Ketu and Sun results in awards and titles. **Saturn is in Venus kala and Venus in the chart is with Mercury and is linked**

to Ketu in the house of applied intelligence. By retro, Saturn will go to Mercury Kala in the house of applied intelligence.

Fig. 27: Scientist - Molecular biology

KET-20	MOO-29		
	Male born on 09-01-1922		
MER-3:22			
VEN-18 SUN-25		MAR-15	SAT-15 RAH-20 JUP-25

Molecular biology deals with Cells and Viruses, Protein Structure and Function, Nucleic Acids, Genomics and Proteomics, Cell Signaling and Apoptosis.

Mars is linked to Moon having Ketu behind in the house of Jeeva karaka. Mars is Body, Moon is flowing materials in the body and Ketu is tiny materials. There is an exchange between Saturn and Mercury. Mercury is an intelligence planet and Saturn a digestive planet. After digestion is completed the intelligence part comes into picture which gets linked to Rahu a shadow planet indicating shadowed intelligence in the tiny material ahead. Rahu is a planet of capturing and Mercury is knowledge. The entire episode is taking place in the presence of Jupiter who is a Jeeva karaka indicating the subject of biology due to involvement of Mars Moon Ketu.

The whole combination indicates the Molecular biology which means the study of material composed of tiny particles.

Jupiter and Saturn having Ketu in Pisces, Moon in the 12th house to Ketu, linked to Sun and Venus, resulted in noble prize for his work on genetic code. Saturn, Jupiter, Rahu and Mars linked to Moon made him to stay in foreign country. **Saturn is in Saturn kala in applied intelligence house. The chart analysis is clear.**

Note: At the end of every horoscope in the above category we have mentioned about Graha rasi kala position of Saturn and the related planets' positional links in the chart. This is an experimentation which we have done in the class and still it is under modifications. We are planning to include the Navamsha lord and Drekkana Lords also into it and then try to make analysis based on this Graha rasi kala. Hopefully, in our next project on health and diseases, we may bring a successful chapter on this. Therefore in the subsequent charts we may not include this comment.

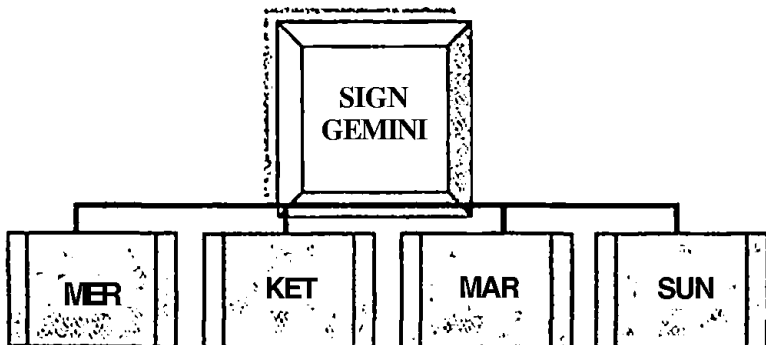

In some cases we have noted the hora lord at the time of analysis just to establish how closely the hora lord will link. The hora lord will be essential in the cases where the horoscope does not give any clue about the matter. With all the expertise in astrology, at times due to reasons unknown, no clue can be seen in some birth charts. At that time, only hora lord will help us to catch a particular point. Therefore, it is better to cast horary chart during live analysis of birth chart. All said and done, the rules of astrology are only a guiding factor to get link with the cosmic plan and the deliverance is bestowed upon the astrologer, due to his constant link established there of, by practicing the rules. Rules themselves are not ultimate. There has to be communication with the celestial bodies to get the right delineation and in order to achieve this, great devotion and sincerity are the essential qualities for an astrologer.

Mechanisation or commercialisation of this sacred science will lead to more confusions, complications and undesirable reactions. We, in Naadi, advocate this character and practice thereof repeatedly and train our students to become mere readers of Naadi significations and to surrender one's intelligence to the almighty. The end use of this great science is to caution the consultant with his past karma and guide him towards salvation in the right path. The prediction part with regard to past or present is only to instill confidence in the consultant on the subject and not in ourselves. By predicting events, we will be stopping the consultant to repeat his sufferings by which he will be released from getting the negative thoughts at least during the consultations. Next step is to give him courage with positive advises and remedies. Beyond this all tall claims of perfect and precise predictions without remedial measures are nothing but to appease one's ego, from the astrologer's point of view.

Observation: Keen observations on the horoscopes of scientists reveal that there are planets in debilitations which are an indication of subject matter existing at the lowest level to be uplifted by research.

Note: It is unfortunate that we do not have the facility to maintain data bank with authenticated birth details. It is the time for all the persons who are in the field of astrology to collect maximum number of horoscopes with authenticated details and make available to the future occult fraternity enabling research programmes in future. Luckily for the purpose of this work, as we are establishing the karma through planetary combination, the absence of birth time does not deter our purpose. Once we understand the matrix and the application technique of relevant significations it is easy to delineate the orientation of karma.

Writers

Sign Gemini is Kathana- which means communication of all kinds. Mercury is knowledge, Ketu represents de-linking factor. A writer gets the thought and he wants to de-link the thought from the mind and put it on paper. Mars represents printing and Sun represents bringing the same to light. Involvement of other planets indicates the nature of such writings.

Fig. 28: Writer - Romance, Historical, Rebellion and political stories

RAH-17		VEN-02 MAR-16 MER-26	SUN-13
	Male born on 27-06-1838		
			MOO-11 JUP-21
	SAT®-01		KET-17

We will establish the sign participation. Gemini is having Sun and it is next to Mercury. Mercury is having Ketu in Virgo and Saturn by retro is linked both with Ketu and Sun.

Mercury is in the house of Venus, who is behind Mercury in the same sign, Taurus and above Mars, Venus is posited in the same sign. Venus is the first planet in Taurus to get the effect of Saturn. In the initial stages, the author was writing on Romance.

Venus is in 2 degrees in Taurus when the combination of planet in 2nd house is considered, Sun is in 13 Degrees and therefore, Venus and Sun forms a combination which Saturn would be encountering. Subsequent works were based on historical matters.

Now the Martian effect starts. Mars is 16 degrees and Ketu falls in 17 degrees approaching Mars which is an

indication of rebellion in nature. The karma planet shifts its activity of writing to rebellion issues. Saturn by retro goes to Libra and is linked to Sun. Thus there will be a double effect of Sun i.e. one immediately after Venus and the other is the Sun's 5th link to Saturn. Naturally, the subsequent works had political background.

Fig. 29: Writer –Book based on Problems of Zamindari, Realistic lives and Rural and Urban problems

JUP-27	SAT-7	MOO-9	KET-14
	Male born on 31-07-1880		SUN-16 VEN-21 MER®- 25
			MAR-14
RAH-14			

Participation of Gemini is predominant with the presence of Ketu. Mercury is with Venus and Sun and by retro is linked to Ketu. Very next sign Leo has Mars. Mars is linked to Rahu.

Zamindari means the land holders who used to create problems to the poor. Mercury is land in the house of Moon and by retro going to Ketu who is a planet of *Bandana*. Sun and Venus in the house of Moon indicate the wealthy persons with nature of cheating and Mars and Rahu link indicate the

atrocities to be committed by them. Jupiter, Saturn and Rahu indicate the*low paid persons or poor persons. This also indicates the realistic lives existed in those periods. Ketu represents lanes and gullies surrounded by water, which in turn indicates rural areas. Sun and Venus linked to Jupiter through Moon house indicate the dynamic (Moon being moving planet) urban people. The works of author were based on the above matters.

Note: On many occasions our students and readers expressed their doubt as to how to delineate the horoscope when all the planets are linked. We wonder how this doubt crept into their mind. There is no rule that all planets should not have a link. As a matter of fact the planets are symbolic representation of the human qualities and contents. For example, Sun represents his esteem, Moon his mind, Mars his ego, Mercury his intelligence, Jupiter his life itself, Venus his pleasures, Saturn his profession, Rahu his illusions and pains, Ketu his dejections and spiritual orientation. All these qualities are activated either negatively or positively depending upon the equation between his past karma and present free-will. A Naadi astrologer should develop the art of prioritising and synthesising the subtle significations of planets and Zodiac signs. Naadi oracles cannot be framed into any limited modern mathematical formulae.

It is customary for a reader to omit the fundamentals, if he is into the subject already and try to go to predictive techniques given in this book. But in our Naadi works every chapter or even a paragraph will have material that would throw light on the subject, which, as a matter of fact, relates to fundamentals. It is absolutely impossible to any author to give all the significations of planets and signs in the fundamental chapter because, they are subject to additions and modifications time and again due to changing life pattern in the modern developing world. For example in 14th century how any astrologer could, at that time, imagine a signification

for computers or cell phones. Every example in this work gives some new angle of interpretation and therefore we request the reader to give some time to each example of illustrated horoscopes. In fact we may not be able to go through minutely as explained in these horoscopes in practical consultation session. Nevertheless, constant practice through these examples the mind will get used to reading the sequence of permutations and combinations and the logic automatically develops. Many of our students strike with unique points from the charts because of constant touch with the subject in class rooms.

For example, we find that the last planet which Saturn encounters in his journey will be his karma with which he settles down. This unique formula we have applied in the above horoscope and the sequence exactly matched with author's book seriatim.

Fig. 30: Writer - Novels, Story, Poetry, Musical play and Patriotic songs

MOO-24	MER-08 VEN-23 SUN-25		MAR- 0.19 KET-24
	Male born on 07-05-1861		JUP-26
			SAT-11
RAH-24			

The Kathana sign Gemini is having essential planets - Mars and Ketu linked to Jupiter and Saturn. Jupiter is linked to Moon in Pisces and Saturn is linked to Rahu in 5th and Mercury, Venus & Sun are in Aries to which Mars and Ketu fall in 3rd sign. There is an exchange of Moon with Jupiter.

Saturn, Rahu and Sun having Mars in 11th indicate the struggle by mass and exchange between Jupiter the Jeeva karaka, and Moon the mind desiring to go to their own places indicates **independence**.

Mars, Ketu, Jupiter and Moon before exchange and Mars Ketu Moon Jupiter after exchange indicate two types of **emotional bondages**. To this group Saturn falls in the next sign which is the house of governing and authority and Rahu influencing in the house of righteousness and in turn linking to exalted Sun, the Mercury and the Venus. This shows **secular riots**.

Ketu, Jupiter and Moon involved in the sign Pisces, indicates the **religious institution**.

Jupiter having link with Saturn, Mercury, Venus and Sun acts as one family and after exchange Moon having link with Saturn, Mercury, Venus and Sun acts as another family. The effect of Mars and Ketu, Saturn and Rahu indicates the **rivalry between the two families**.

Mars, Ketu and Moon indicate critics and the indulgence of Jupiter indicates the author himself. Saturn and Rahu indicate the illusionary personalities in the work. He has authored a book where the main character **in the story criticises the poet who is the author himself**.

Rahu and Saturn indicate a different religion and Venus represents fruits, having Moon behind indicates selling. **The author wrote a story on fruit vendor of foreign origin. Ketu Jupiter and Moon indicate the metaphysical matters.**

Saturn is in the house of Sun and Sun in its exalted position and in exchange Moon joining Saturn in the house of emotion all leads to indicate the **patriotic works of the author in the shape of songs which have become regional and national anthem.**

This great author has to his credit the works based on the matter appearing in bold letters in the above paragraphs.

Fig. 31: Female Writer - Novelist and short story writer

SAT-12	VEN-24	KET-22 MER-23	SUN-09
	Female born on 24-06-1937		
JUP®-2			
MOO-12	RAH-22	MAR®- 27	

Sign Gemini is having Sun, who is linked to retrograde Mars, who by retrograde goes to Virgo and is linked to Ketu and Mercury and in 9th Jupiter in Capricorn is also linked to Saturn due to exchange of Jupiter with Saturn. By retrograde Mars is also linked to Saturn and Jupiter, who even after exchange establishes the link with Mars. Apart from linking directly to Venus who is linked to Moon, Mars also get exchanged with Venus and links to Moon. Moon gets the link

of Jupiter due to retro Jupiter, and after exchange is linked to Saturn. Moon is linking with Sun. Jupiter is establishing the link to Sun through Moon and after exchange due to its retrograde position from Pisces links again with Sun from Aquarius.

Venus, Moon, and Retro-Jupiter who is coming from his debilitated place indicate the **sensitive nature of female character**.

Venus, Moon and Mars as one group and Jupiter, Moon and Mars as the other indicate the **tension in two family circles**.

Venus is linked to Saturn, Moon and Jupiter and after exchange with Mars falls on the other side of Rahu and Ketu axis which separates Venus from the association of Saturn and Jupiter. **This indicates isolation of women**.

Moon, a blemish planet, in the house of tradition having Rahu behind and a debilitated Jupiter's linking to Ketu indicate the **demise of tradition**.

Mercury and Ketu indicate the **short stories**.

The works of this novelist are based on the matters highlighted in bold letters in the above paragraphs.

The Sun gave her the name and fame.

Fig. 32: Writer - Novel, short stories and plays

		JUP®-7	MOO-2
KET-0.21 SAT- 5	Male born on 12-12-1905		
MAR-26			RAH- 0.21
MER®-5	VEN-12 SUN-27		

Gemini is having Moon, who is directly linked to Mercury, who in turn, by retro, is linked to Venus and Sun. Moon is also linked to Ketu and Saturn. Mercury is linked to Rahu. Jupiter is linked to exalted Mars and links to Venus and Sun.

Saturn is hemmed between exalted Mars and Ketu which indicates the poor and downtrodden. Jupiter by retro views his own house where Mercury is running away from it. His novels were based on this subject. It shows the deprival of knowledge to such downtrodden. Mars, Saturn, and Ketu indicate the low level defence personnel and the Moon link shows travel. He wrote a novel based on the experiences of Indian soldiers deployed to fight First World War.

Note: If you master the signification of sign and planets and use logic in developing more significations relating to the present environment, development and progress, we can study the charts deeper and get many hidden matters to light.

Fig. 33: Writer

Supernatural power friction, Politics and religious controversy

	VEN-8	MER-5	SUN-24

Gemini has Jupiter and Moon is linked to Mercury. Jupiter, Moon and Mercury are linked to Saturn directly. By retro Saturn is linked to Ketu. Mars is linked to Saturn.

In his works, he created an illusionary back drop of a place in such a realistic manner that readers were made to believe the existence of such a place. This is due to the Moon, Rahu and Mercury combination. Moon and Rahu indicate mental illusion and Mercury represent the land. Institutions and religious places are indicted by Mars, Sun and Ketu.

Jupiter - Saturn - Ketu = Ordinary people

The characters in his novels were very ordinary, down to earth people trying to blend tradition with modernisation (**Mars and Sun**) often resulting in tragic and comic situations (**Rahu and Mercury**). There was always an element of humour in his works which is represented by **Jupiter, Moon and Mercury**.

Fig. 35: Writer –Poetry, writings on Travel, Novel in verse, Novels in prose

		MAR-09	SAT-15

Gemini is having Venus, Sun and Mercury and is linked to Mars. There is a link between Saturn, Rahu and Moon. Jupiter is linked directly to Mars, that is in 2nd house to Saturn. Jupiter links the Moon influenced by Rahu. This is followed by Venus, Sun and Mercury.

One of his Novels refers to a financially secure upper-middle class young people in their 20s and early 30s in San Francisco. This is indicated by the following planetary

combination. (Rahu, Saturn and Moon) (Venus, Sun and Mercury)

Another Novel is set in post-independence era, post-partition India. It is a story of four families in which a mother searches for a suitable alliance to her daughter. It also covers the various issues faced by post-independence India, including Hindu-Muslim strife, abolition of the Zamindari system, land reforms and empowerment of Muslim women.

Moon - Mother, Venus - daughter, Mars - the bridegroom, Sun, Mercury and Ketu and Saturn falling between Venus and Mars are indications of the struggle to find the bridegroom, Mars. Saturn approaching Mars and Mars linked to Jupiter and Jupiter linked to Moon and Rahu indicate the struggle for independence. Rahu, Moon, Jupiter and Mars with Saturn indicate the communal riots. Sun, Mercury, Venus and Mars indicate the Zamindari system and land reforms. Rahu and Moon having Venus, Sun and Mercury in the next sign indicate the empowerment of Muslim women.

In another book he depicts a love story of a professional violinist who lost his love and never recovered from the loss. After a gap of ten years when they meet, their passion gets rekindled despite the lady getting married to another person and having a child. It is an inner life-story of a musician.

Ketu approaching Mercury from the arts house, Moon (Ketu - string or wire) Mercury - expression, Mars - instrument and Venus combined with Moon signify Music, having link of Rahu indicating sound waves. Jupiter is the hero of the novel, a musician who plays a stringed instrument. Ketu and Mercury indicate love affair. Mars link to Mercury indicate failure in love affair. Jupiter to Meet Mercury, there is an effect of Moon and Rahu in between indicating the gap. When Jupiter goes to Gemini after a gap he meets Venus who is actually his lover but she is married to another person which is indicated by link of Mars, the husband. The Sun in Gemini represent

the child of the women. In spite of this she develops intimacy with him and the rest of the story goes on. Apart from this, author has written poetry and stories on travel and biography.

Gemini has Mars and Venus linked to Moon and Rahu. To this combination in 7th, Sun, Mercury, Jupiter and Ketu are in Leo. Mercury, on retrograde, goes to Cancer and is linked to Saturn in Capricorn. Saturn by retro is linked to Sun, Mercury, Jupiter and Ketu and in his original position he has Moon and Rahu in 2nd.

Saturn and Rahu linking to Mars indicate slavery. Mars, Rahu and Moon indicate revolution. Saturn and Ketu indicate oppressed and poor. Sun, Mercury, Rahu and Moon indicate corrupt politicians. Moon, Rahu and Mars represent guerrillas.

This author has written about slavery, revolution, guerrillas, corrupt politicians, the poor and the oppressed, interpreting the rages so deeply rooted in our society.

Fig. 37: Writer - Witty and humors works

			SAT®-03
RAH-4 JUP-7 MER-7	Male born on 02-02-1915		
MAR-10 SUN-20			KET-4 MOO-15
VEN-3			

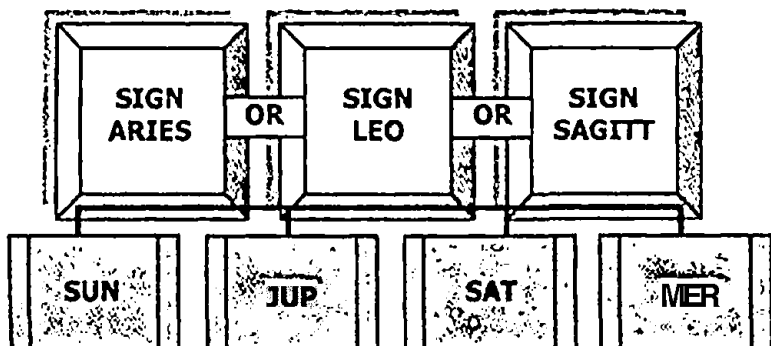

From the sign Gemini Saturn directly links to Rahu, Jupiter and Mercury in Aquarius and by retro Links to Mars and Sun. By exchange with Mercury, Saturn joins Jupiter, Rahu and goes to his own house. Saturn is directly linked to Venus who is having Rahu, Jupiter and Mercury in 3rd. Ketu and Moon are posited in Leo.

The native is an Indo-Anglian novelist whose works are best known for his forceful secularism, wit and humor. Western and Indian social behavioral characteristics in the society are depicted with a touch of hilarity.

Rahu, Jupiter and Mercury indicate secularism. Saturn is linked to Mars and exalted Mars indicate the forcefulness. Mercury indicates wit and humor. This author is best known for forceful secularism, wit and humour in his works. Ketu and Moon in the eastern sign establishing link to Saturn, Venus, Sun and Mars on one side, Rahu Jupiter and Mercury

in the western sign having link of Saturn again with effect of Venus, Sun and Mars on the other side are the indications of his works on Western and Indian Social behavioral characteristics in the society with a touch of hilarity (Mercury).

Politicians

One sign out of Aries, Leo and Sagittarius must participate at the least. The Sun being a ruling class planet must be strong and if it is weak - must be supported by another exalted planet or Jupiter. Saturn being the planet of Karma should link to Sun. Jupiter representing Jeevakaraka and also a planet of nobility must support the combination. Mercury represents intelligence and Rahu the hard work and secrecy. The link of Ketu indicates fame. Mars, the planet of power is optional for a politician to exercise power. The effect of Moon and Rahu circumstantially change either good or bad nature of the politician.

Fig. 38: Top politician - President

VEN-14	MOO-12	MAR-22	ASC 20
	DR. ZAKIR HUSAIN 08/02/1897 15:15 Hyderabad		KET-23

	SAT-8		

Aries and Leo - both the signs are participating with the planets Moon and Jupiter linking together. Saturn is linked to Mars who in turn is linked to Sun, Rahu and Mercury. Saturn is also linked to Jupiter and Jupiter by retro links to Ketu representing Keerti - fame/award/reward. Venus in its exalted position links to Ketu indicating highest award.

3rd President of India with Bharat Ratna award.

There are number of methods to decide profession in Classical approach we give below some of them and try to get the profession in this case.

Most frequently used provision is: Planet in 10th house or the lord of the 10th house position in the Navamsha sign and then see that Navamsha lord in Rasi chakra to get the profession. The ascendant in the above chart is Gemini and the 10th house has Venus and the 10th Lord is Jupiter. We will see the Navamsha chart.

Fig. 39: Navamsa

Asc			
			Ma Mo Ra
Ke Me			Ju®
	Ve		Su Sa

Diagram illustrating the relationship between the Ascendant (Asc) and the Sun (Su) in the 12th house, showing the placement of the Moon (Mo) and the planets Mars (Ma) and Venus (Ve) in the 11th house, and the placement of the Sun (Su) and Saturn (Sa) in the 12th house. The diagram also shows the placement of the planets Jupiter (Ju) and Uranus (U) in the 12th house.

Venus is in Mars Navamsha. Jupiter is in Sun Navamsha. In the natal chart Mars is in Vrishabha 12th house from Ascendant and Sun is in Capricorn 8th house from Ascendant. Mars casts his aspect on Saturn in 6th Rahu and Sun is with Lagna lord in 8th house. This formula is not convincing.

Next formula is seeing the Ascendant and its lord. Ascendant is Gemini it is hemmed between two malefic. The Lord has gone to 8th house but he is with Sun and Rahu. Except that Sun being with Lagna lord gaining some strength and sun being 3rd lord and his position in 8th does not warrant serious affliction. But he is with Rahu. This is also not convincing.

For politics 1st 5th 7th 9th 10th and 11th houses should be strong. 1st house its lord we have already seen. 5th house is being aspected by Moon the 2nd lord though he is disposer of Ketu we can consider this as good aspect. 5th Lord is in 10th exalted. (1) 7th house has an aspect of 11th lord from 12th and he is a natural malefic. 7th house is hemmed between malefic. The only good point is Jupiter is in a friend's house and being retrograde gains strength and he is also Vargothama and he is in the house of Sun representing the sign Leo a kingly house. (2) 9th house has the aspect of strong Jupiter. A house aspected by Jupiter will gain full strength and in this case it is being aspected by 7th and 10th lord who is very strong (3). 10th house has no aspect by any planet but it is having exalted Venus who is also 5th Lord. The disposer of 5th Lord Jupiter is strong. (4). 11th house is having Moon though Moon is not strong being 2nd lord will not harm the house. 11th house is having the aspect of strong Jupiter which nullifies all other bad effects. (5) Except Lagna lord all other houses related to politics have flourished. This method in this chart has effortlessly tallied to give the political career and the fame due to Jupiter 10th lord in kingly sign. Jupiter represent 10th, 7th and predominately 3rd house which has made him as best educational thinker which was his prime karma.

Fig. 40: Female politician - with Royal background

		KET-2 MOO-9	ASC-19
	Smt. VIJAYARAJE SCINDIA 12/10/1919 - 23:00 GWALIOR		JUP-21
			MAR-9 SAT-15 VEN-20
	RAH-2	MER-6	SUN-23

Jeeva planet for female Venus, Karma planet Saturn posited in Royal sign Leo which is a prerequisite for ruling class. She hails from the royal family of Gwalior. The chain link of Jupiter through Mercury involves all the planets related to politics.

She won seven consecutive parliamentary elections. She played a key role in propagating the party's Ramjanmabhoomi agenda and was considered a hardliner. She remained a BJP vice-president until 1998.

Cancer is considered as the ascendant of Rama. Jupiter being there and seized by Rahu from the debilitated house of Moon, Sun Joining Mercury opposing Rahu indicates the relationship with the agenda of Ramjanmabhoomi. Moon with exalted Ketu and linking to Sun indicate the Royal credits and the retreat from her children.

We shall try the classical approach for this chart also.

Fig. 4 1 :

Moo			Ma	
Asc			Ra	
Ju Ke			Sa Su	
	Me		Ve	

Ascendant is Gemini and the 10th house is Pisces which has no planet. 10th lord is Jupiter. Jupiter is in Capricorn Navamsha. The Lord of Capricorn Saturn is in the royal sign Leo in rasi chart. Saturn is with 11th and 5th lord. It seems to be satisfactory though 3rd house representation has two natural enemies however 5th and 11th lord participation is considered good.

Ascendant is Gemini and it has no malefic aspect. It's lord is Mercury and it is in 5th house. Mercury has the aspect of Saturn who is 9th lord principally. His 8th effect is minimised due to placement in 3rd house with an enemy and also in an enemy sign. Though Mercury is hemmed between two malefic the Rahu effect is reduced because of aspect of exalted Jupiter on Rahu in 6th house. Both the methods though not completely satisfied but have not failed.

1st house is considerably good. 5th house is hemmed between two malefic but this ill effect is removed by aspect of exalted Jupiter on Rahu. 5th House has the aspect of Saturn being 9th lord and also a friendly planet to 5th lord. 5th lord is placed with 9th and 11th lord. 7th and 10th lord Jupiter is in 2nd and he is exalted. In case if we consider the aspect of Rahu

on Jupiter, it has no effect as Rahu is in an enemy camp. Of-course the 6th effect will definitely be felt by the native at a later stage. Whenever the malefic influence negativity it would be more apparent in personal matters than the material matter. Here also the 3rd method seems to be more convincing than the other two methods.

Fig. 42: Politician - Short term Prime Minister

Sign Aries and Sagittarius are participating. Saturn is linked to Rahu and Moon. Sun, Mercury and Ketu are linked to Jupiter. Rahu and Moon are linked to Mercury and Sun. Mars is linked to Venus. Mercury, Ketu and Sun are linked to retrograde Venus.

We have some details on this horoscope, which are used to study the effect by transit. This is one of the techniques of Bhrighu Naadi, where in, by moving Jupiter we will read the results periodically. We shall apply this technique for this chart and study the results periodically.

At the age of 27-28 Jupiter transits in Leo linking Saturn, Rahu and Moon and the natal Jupiter is in 7th to natal Saturn.

Jupiter and Saturn combination with Moon and Rahu is a change in Karma for better prospects. During **1957-85, he was a Member of the Madhya Pradesh State Legislative Assembly.**

At the age of 33-34, Jupiter was transiting in Aquarius and Pisces linking Sun, Mercury, Ketu and retrograde Venus with effect of Mars having Rahu and Moon in Aries. Moon with the link of Venus and Mars indicates Agriculture and Mercury link indicates information and Jupiter, Ketu and Sun indicate public relations of Government. During **1963-1967, he was a Minister of State for Agriculture, General Administration Department (GAD) in the government of India and Information & Public Relations in the State Government of Madhya Pradesh.**

At the age of 42-43, Jupiter's transit in the sign, Sagittarius, where he will be touching natal Saturn who is having Jupiter in Gemini linking to Mercury, Sun, Ketu and retro Venus. During **1972-77, he was a Minister of Education, Government of Madhya Pradesh.**

At the age of 51-52, Jupiter transiting in Leo will have natal Saturn in Sagittarius - both the ruling signs, which made him to hold a high post. Jupiter and Saturn are linked to most of the planets. During **1980-85, he was Chief Minister of Madhya Pradesh.**

At the age of 55, Jupiter was transiting in Capricorn, Linking to Mars, Sun, Ketu and Mercury - gave him the Governorship and due to the effect of Mars and Ketu, there was a change after a short period. During **March - Nov. 1985, he was Governor of Punjab**

During November 1985, transit Saturn entered Scorpio touching natal retrograde Venus linking again to Sun and Ketu, while Jupiter was still having the effect of Mars and Ketu. During **Nov. 1985 - Jan. 1986, he was Minister of Commerce, Government of India.**

During October 1986, Jupiter was transiting in Aquarius linking to Natal Jupiter, Sun, Mercury and retrograde Venus. During **Oct. 1986 - Feb. 1988, he was Minister of Communications, Government of India.**

During February 1988, Jupiter entered Aries and having Moon in Aries and linking again to Sun, Mercury Ketu and Venus has shifted the position. During **Feb. 1988 - Jan. 1989, he was Chief Minister, Madhya Pradesh**

Jupiter was transiting in Cancer during June 1991 and having transit Saturn in Capricorn, who by retro linked to natal Saturn and natal Moon. Transiting Jupiter is linked to retrograde Venus which connects Sun, Mercury, and Ketu. During **June 1991 - Dec. 1994, he was Minister of Human Resources and Development, Government of India.**

During April 1998, Jupiter was transiting in Aquarius but was with Ketu, Jupiter was blocked to get the good effect of natal planets. **April 1998 - He Lost from Hoshangabad, in the elections to the Twelfth Lok Sabha.**

During April 2000, both Jupiter and Saturn were transiting in Aries linking to Sun, Mercury and retro Venus. **In April 2000, he was elected to the Rajya Sabha**

During May 2000, Jupiter and Saturn were still in Aries with Moon and due to transit of Sun and Venus, which are linked to natal Sun and Venus, there was a change in his position. During **15 May 2000 - Feb. 2004 Member, he was a member of the Consultative Committee for the Ministry of Home Affairs.**

During May 2004, Jupiter was transiting in Leo linking to natal Saturn while transit Saturn was in Gemini linking to natal Jupiter and has given the professional status. **22 May 2004 onwards, he is a Minister of Human Resources.**

Note: There are other methods of moving Saturn for every 2 ½ years in a sign. Every planet can be moved similarly considering it as Jeeva karaka as regards the Karakatwa represented by that planet, on yearly basis to know the results of the concerned relative. These are general results, but to find out the obstructions and modifications of results simultaneously, we must also move Rahu and Ketu and to the effect of Karma the Saturn has to be moved.

Important: There is a myth about the debilitated planet. In this horoscope, both Sun and Mars are debilitated and yet there was no effect on the significations as far as ruling and power factors are concerned. The debilitated effect of the planet will be seen on the relative represented by the planet. However, in this horoscope, both Sun and Mars are linked to Jupiter indicting the self efforts by the native in getting political positions.

SUN-4 MER-22	RAH-13 VEN-22		

This is a horoscope where the sign Libra is not participating directly, but both Moon and Mars are influencing this sign. The sign lord Venus is predominantly participating, linking all the essential planets in a chain format. Ketu is linked to Jupiter, that is in the chain. Saturn, by exchange with Jupiter, is linked to Ketu and Jupiter is linked to Venus.

Note: Rahu and Ketu will have their influence on the 2nd sign to them. Due to this Rahu influences the sign Libra with Venus effect.

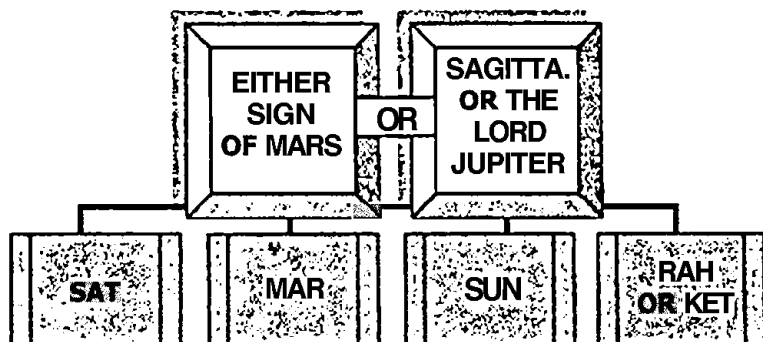

Fig. 58: Legal Head

	JUP-4		

Sign Leo is participating with Mercury. Sun, Venus and Ketu are linked to retro Mercury. Ketu, Venus, Sun and retrograde Mercury are having Jupiter in Scorpio. Jupiter is directly linked to Saturn and Moon who in turn links Mars and Rahu in Capricorn.

Mercury, representing land, is going to Venus by retro and Venus by exchange with Moon goes to Saturn. This indicates the land revenue. The native served mostly in Land revenue related services.

Insurance Personnel

Sign Pisces represent Yogakshema (i.e. insurance). Jupiter is Jeevakaraka, Ketu the end of life and Venus is Money. Saturn is Karma, Rahu is Apasavya karma. This indicates "***Jeevanmukti Dravya Apasavya Karma***" (Apasavya karma is done after death) this can be termed as Life Insurance also.

Earlier, Life Insurance Corporation of India was the only organisation which was handling Life insurance. But in the 21st century many corporate and multinationals have entered the life insurance market. The personnel involved in these organisations might take care of/discharging duties connected to this particular branch of insuring lives directly or may take up other branches/departments/functions of the company. Therefore, there could be tricky combinations in the horoscopes of the personnel working in such organisations. However, with regard to personnel working in Life Insurance Sector, we may have lesser complications in finding the signification in accordance with the orbital providence.

We first give a few horoscopes of personnel working in the corporate sectors handling the life insurance.

Fig. 78: Sales Manager in a corporate sector handling life insurance

Note: Study this carefully there are important points in this analysis.

KET-11	MER-13	SUN-6	VEN-5 JUP-13
Asc-19	Male born on 21-05-1978 - 01:20 - Madras		MAR-24
			SAT-0.39
		MOO-12	RAH-11

Ketu is in the sign Pisces. Jupiter is with Venus in Gemini. In the next sign to Jupiter there is Mars which is linked to Ketu and Saturn is in the next sign. In another way Saturn is having Mars in 12th linked to Ketu in Pisces and Venus and Jupiter are in 11th. The condition is anyway satisfied.

The Saturn is linked to Rahu and next Moon indicates a foreign relationship and Moon is linked to Venus and Jupiter, which indicates Jeeva Dravya. Jupiter and Venus are linked to Mars and Ketu indicating that this money relates to Deha Mukti. This company is a joint venture of UK and Indian firms. Not considering Rahu and Moon ahead, the Saturn as Indian company is in the house of Sun and links to Mercury placed between Ketu and Sun, indicating that this company is linked to health care products. This is not the first job of

native, as Saturn links to Mercury in Aries and Mars behind, forcing ahead with Rahu, a menial job provider and then meeting Moon, a changing planet, which links to Venus and Jupiter - indicate that this native has started his career at a lower level and reached high with his intelligence. He will have change in profession further in a couple of years and then he will settle down in life after 2011. It is due to transit Saturn reaching Moon during that time linking Jupiter and Venus. We have given so many details to explain that the cosmic plan has to include many matters pertaining to karma in detail and therefore, the orbital providence will have twists and turns which needs to be understood and find the means and ways to decode them. Therefore, we need to forge many methods to find ways and means to link the planets and signs with appropriate significations to derive the matter. The famous Naadi rule of linking planets from 1, 5, 9, 2, 12, & 7 is a generalised theory. This helps in generalised study of horoscope. For deeper study we need to move the required planet through the zodiac and find how they get linked to signs and influence a planet from the above positions. We need to split or Join the combinations to get the details. The exchange of planets, the retrogression of a planet is to be considered carefully.

Most important: Retrogression and exchange of planets are to be considered with logical interpretation. Suppose, Mercury is retrograde and is linked to Jupiter in the birth chart then in the first round of Jupiter the Mercury gives the effect from its original position and the planets linked to it. Having given this result, in the 2nd round of Jupiter, Mercury gives its retrograde effect and the planets linked to it. In the 3rd round, it gives the result from original position for a different matter or for the same matter depending on the link of other slow moving planets linked at that particular time. This alternate effect continues to give the different significations of Mercury with due modifications by other

transiting planets at that time. This applies to all planets. Therefore, irrespective of the matter under study, we should move the planets carefully and study the karakatwa it is getting from the other planets with due modifications in relation to linking of planets both natal, transit and retrograde and exchange of planets as well. Exchange of planets can take place in the natal or transit chart or between them. Jupiter in 2nd round of transit, if retrograde, and when linked to Mercury, who is also retrograde, it is clear that there is a sense of withdrawal for Jeeva karaka towards a friend and the friend is also equally shying away from Jupiter. In the first round it could mean the boy is forcing behind from education. Considering Mercury as education, due to its retro nature it does not fully extend its quality being in that sign. We have given this as example to explain the subtle logic in application.

Fig. 79: Insurance Personnel

VEN-24 SAT-4	MER-28	MAR-0.35 RAH-2 SUN-6 MOO-7	JUP-10
	Male born on 20-05-1966 18 hrs Chittoor		
	KET-2	Asc-29	

Saturn is in Pisces along with Venus having links with all the planets in Graha malika. Here also Saturn is getting linked to Rahu and Moon indicating the foreign relation. He is a Sales manger in a Joint venture company as said in the earlier chart.

Fig. 80: Financial planning officer in an Insurance Company

MER-10	SUN-1 MOO-14	SAT-11 VEN-17 MAR-19	
	Male born on 14-04-1972 22:30 hrs KGF		KET-8
RAH-8			
JUP-15	ASC-28		

Mercury is in the house of Pisces linking Jupiter through Moon and Sun in the next house and Ketu is in Cancer proceeding towards Saturn and Venus. All the planets and sign requirement is fulfilled. This link has definitely a different meaning.

Note the fact that this gentleman is a financial planner for the Company. The intelligent planet Mercury is in the sign

of (Insurance) Pisces. It is having Moon and Sun in 2nd which are linked to Jupiter in Sagittarius. Mercury is linked to Ketu in Cancer. Mercury is carrying all the effects of other planets reaching Saturn who is with Venus and Mars in the house of Sekarana (Taurus sign of accumulation). The Karma is of Venus, the money, and Mars is spending judiciously having Moon in 12th and Mercury in Insurance house linking Ketu. The funds generated out of Insurance business are being managed by the native. Let us go further deep to find out why this tricky combination has occurred here.

At the first place Saturn with Venus and Mars in the house of treasury linking Rahu indicate it is a bank employment. Now move this bank ahead. This combination has no planet in 2nd sign but gets the influence of Jupiter supported by Rahu. But, even Moon and Sun also join along with Jupiter. In the very next sign there is Ketu indicating trouble to Bank. But, due to Sun having Mercury in Pisces and linking with Jupiter and Rahu indicate the foreign institution back up lending its name to support the name of this bank. Now let us see what is this foreign company. Jupiter is having Rahu, approaching, linking to Sun and Moon indicate the same. Sun and Moon are children of Jupiter and Rahu indicate troubled children; the support of Mercury behind children is education to children. This institution is engaged in the global programme to educate underprivileged children. With this institution's support the Indian bank collaborated prefixing its name to the bank. It is now a joint venture bank handling life insurance as a different branch. All this history has to be covered and then match the orbital providence for insurance. That is why we cannot find rules directly applicable but if studied in deep, every rule will be applicable.

Fig. 81 : Insurance personnel - Area Manger

		RAH-21	

Except for the Saturn's influence from Cancer, the sign Pisces is not apparently participating. But Jupiter is just less than 1 degree in Aries still having influence of Pisces. Ketu influences Pisces. Saturn, by retro, goes to Gemini and due to this there is an exchange between Mercury in Capricorn and Saturn in Gemini. Saturn gets link of Venus, Moon and Mars having Sun in 2nd. Saturn from Cancer is influencing the sign Pisces to which Jupiter and Ketu are posited in 2nd sign, Aries. The background of insurance is seen but the functional matters are differing as far as the native is concerned. There is a combination of Venus, Mercury and Moon having Sun in 2nd to which Jupiter is in 11th. In this entire combination Mars and Ketu are involved in disturbing the mind, Moon and Mercury the planet of cooperation and friendship. To remove the effect of Mars and Ketu, the Kama Karaka is involving who is enemy to both Mars and Ketu.

This allows others to function smoothly. Saturn is more involved in relationship matter than the insurance matter making subtle involvement of Jupiter, Ketu and sign Pisces. Saturn linking with Moon and then, by retro, linking to Rahu is an indication of the involvement of foreign element. He is working for a Joint venture company as personnel relationship manager.

**Fig. 83: Insurance Personnel -

Jupiter and Venus exchange places. Thus, Jupiter Comes to Pisces and Links with Saturn and with Mercury, Sun in Aries and Ketu in Cancer. Saturn from Virgo links with Jupiter, Mars and Venus and by retro links to Mercury and Sun. Jupiter by exchange with Venus links to Ketu, which is the cause for getting many awards. Sun and Mars indicate Surgery, Ketu indicates removal of a part and Mercury indicates replacement. The native is a Cardiac Surgeon.

Fig. 91 : Doctor turned politician

	JUP®-26		
	Male born on 15-10-1952 Doctor turned politician		KET-27
RAH-27			MOO-15
MAR-9		MER-12 VEN-28	SAT-25 SUN-28

Sign Leo has Moon in it. Jupiter by retro goes to Pisces. Saturn, Sun and Ketu are linked to Jupiter. All the necessary sign and planetary participation for Doctor are fulfilled. Saturn is with Sun and links retrograde Jupiter in Pisces. Jupiter is in Aries and links to Moon in Leo who is 12th to Saturn. The essentials for politician are also fulfilled. He is a Doctor turned politician with ministerial posts to his credit.

Fig. 92: Doctor a convicted criminal

	Male born on 21-01-1899 A doctor convicted criminal		MAR®-5
SUN-9			
MER-17 RAH-16	VEN-24 SAT-27	JUP-16	

Saturn is linked to Mars and Mars is having Sun in 7th, in Capricorn, and by Retro, Mars links to Ketu and in turn Ketu links to Jupiter. The combination needed for a Doctor is perfect. But Rahu is approaching Saturn, who is linked to Mars and Moon. Jupiter is linking to Ketu which is having combination of Saturn, Rahu, Moon and Mars. The Jeeva karaka is in the bandana yoga due to Apasavya (wrong deeds) karma.

He was a convicted fraudster and a suspected serial killer. Between the years 1946-1956, more than 160 of his patients died under suspicious circumstances and he was found guilty in a subsequent trial for 13 offences.

Note: The sign Pisces and Leo have not participated directly due to the criminal activity involved. Both signs are influenced by Rahu and Mars.

Fig. 93: a doctor who is also writer of friction thriller

KET-27 MOO-17	MER-3 JUP-4 SAT-13 SUN-21	MAR-28	VEN-5
	Male bom on 4-05-1940 A Ophthalmologist, and Writer		
			RAH-27

Moon with his Ketu effect is linked to Saturn, Sun and Jupiter or in other words, Saturn, Jupiter and Sun are hemmed between Ketu and Mars, which is essential for the profession of a Doctor. The predominance of Moon getting the link with Sun is an indication for branch of medical profession i.e. Ophthalmologist.

Rahu is linked to Mars and Mars is having Venus in the "Kathana" sign, which is essential for a writer. Rahu and Mars indicate thriller. Rahu is suspense and Mars is action. Moon in the axis of Rahu and Ketu is binding the mental condition i.e. unconsciousness. Jupiter hemmed between Moon and Ketu on one side and Mars on the other side - indicates removal of a body part. This Doctor wrote a thriller in which the victims are sent to coma and their vital body parts were removed for trading/marketing. This novel was also filmed under the same title "Coma".

Fig. 94: Doctor and a politician

	RAH-3

MER-21 MAR-16 SUN-2			SAT®-12
JUP-21 VEN-10		KET-8	

Saturn is linked to Jupiter. Saturn also links with Venus, who is the disposer of Ketu. Saturn is in Leo, the house of Sun. Saturn, by retro, goes to Cancer and links to Sun directly. Saturn also has exchange with Sun and links to Mars and Mercury. The requirement for medical profession is matched with the effect of Ketu through Venus. The Sign participation Leo and Sagittarius, link of planets Sun, Jup and Mercury helped him to become a politician with a respectable post/position. *Please note this person was born on Sunday, a day ruled by Sun. At the time of writing this horoscope the time was 9:47 pm at Hyderabad on 7th April 2009 Tuesday and the hora lord was Sun.*

In the above horoscope, the day of birth was Sunday and the lord of the day is Sun and at the time of analysis, the hora lord was also Sun. We have mentioned this because, fortunately we have another horoscope of a native born in some other place on 15th January 1949 where in the planetary positions remained the same but the day happens to be Saturday. He is neither a doctor nor a politician. He is just a common man. At the time of studying this horoscope i.e. on 8th April 2009 6:45 am, Wednesday, the hora lord is Mercury. This native was accounts personnel. Saturn in the horoscope is retrograde and links to Mercury and Moon. He has changed many jobs and he is interested in arts. The planetary position being same, we are not reproducing the horoscope for this case.

Note: The combinations given in Naadi books are only a guiding factor for making different combinations and significations and the matter has to be confirmed with the individual natal and horary chart. The consideration of day lord and hora lord at the time of birth will enhance the predicting power in pinning down the matters. We have emphasised this repeatedly in our earlier book "Revelation from Naadi Jyotisha". We once again repeat that no horoscope is to be analysed without considering horary chart at that time.

Fig. 95: a doctor and Cricketer

	Male born on 24-05-1942 A Doctor and Cricketer		
KET-16			RAH-16 MOO-17

Saturn, Sun and Ketu having Jupiter in Gemini, has made him a medical person. In our book celestial matrix we have given the matrix for Cricket players. Mars is power and Jupiter is Jeeva karaka and Mercury is playful. When this combination is strong, it gives the signification for a player. In this chart Jupiter is with Mercury and Mars. Behind this combination Saturn, Sun and Ketu are posited. Therefore, the combination of player is ahead and the combination of Doctor is behind. This native preferred playing cricket to the medical profession.

Combination for Engineer

Saturn + Mars and other planets will indicate the branches of engineering.

Note: We could not identify specific sign participation in this category. We could only give four examples of different engineering faculties. So far, what we have observed is either the sign or sign lord's participation are definitely involved for a particular Karma. Here, the Mars himself is "*Vidhyuth kanthi Sama prabham... shakti vantam*" i.e. Energy and Power both. This energy and power relates to all the signs. Perhaps this could be the reason why no sign participation is seen significantly in this branch.

Fig. 96: Engineer

Chapter –8

New findings in Naadi Techniques

Child birth

Male planet Sun, Mars and Mercury associated with them

Female planet Moon and Venus and Mercury associated with them.

Carefully considered Rahu when linked through Mercury (male or female) or Venus (only female) indicate more issues though creates problem.

The signs owned by the above planet will represent the same gender. The Jupiter signs and Saturn signs will render the gender qualities of the above planets posited in their signs.

Ketu and Saturn are sometimes considered female planet in other context but not for children.

From the Naadi position group the male planets linked to Jupiter and Saturn and similarly the female planets.

Now strike of the planets obstructed by their enemies, Rahu and Ketu.

Remaining are the survived issues according to the gender remained.

Diseases

The diseases are caused due to imbalance in tridosha i.e. Vata, Pitta Kafa, and Pancha Bhoota that is Agni, Vayu,

Apa, Prithvi, Akasha and Sapta Dhatu - Asti, Kana/Majja, Veerya, Rakta, Rasa, Medha, and Mamsa. The relationship and corresponding planetary attribution to them according to Naadi Astrology is given below. This will help in many ways to decide upon the disease and cure there of.

FIRE			WATER		AIR		EARTH	SPACE
AGNI			APA		VAYU		PRITHVI	AKASHA
Sustained Fire	Destructive Fire	Deposited Fire	Secretion Fluids	Dilution Fluids	Circulate	Disturb	Retain	Expand
SUN	MARS	KETU	VENUS	MOON	SATURN	RAHU	MERCURY	JUPITER
Pitta	Pitta	Pitta	Kafa	Kafa	Vata	Vata	Vata	Kafa
Asti	Kana Majja	Dhatu Bandana	Veerya	Rakta	Rasa	Dhatu Viccheda	Medha	Mamsa
Bones	Cells and Marrow	Arrest	Semen	Blood	Digestive Enzyme	Discharge	Brain Cell	Flesh and Fat

The simple rule to assess the disease by Naadi system:

Diseases by Karma effect:

Point No: 1 Saturn is karma karaka - If Saturn is linked to Fiery, Watery, Earthy and Space planets - as per Naadi rules (i.e. in 2, 12, 7, 1, 5, 9 places from it) - The diseases prone are connected with the Tridosha, Pancha Bhoota and Sapta Dhatu affecting the relative components/parts represented by Saturn.

Diseases by Jeeva effect:

Point No: 2 Jupiter is Jeeva karaka - If Jupiter is linked with the planets as said in the point No: 1 the relative effects of the planets as shown in the table will affect the basic component of Jupiter and the Native will get affected with the relative diseases.

Point No: 3. all the relatives must be considered as per Jeeva karaka but it will only indicate problem in the native's horoscope and the real diseases are to be indentified with the chart of the relative.

These are additional points to the chapter on diseases in our book "Revelation from Naadi Jyothisha".

We have given a few valuable points about diseases. Medical Naadi Astrology is a vast subject and we are planning to go in for a separate volume on this in our coming projects where in, we would like to touch subjects like Ayurveda and Homeopathy in relation to Astrology.

Quick glance analysis:

Saturn linked to Moon is an indication of past bad karma being affecting the peace of mind of the native. It is an indication that the native will suffer with some chronic disease.

This will be more predominant when Saturn transiting in 12th to Moon, over Moon and in 2nd sign to Moon. This is what is popularly called "Sade Sathi" or "Elarata Shani". Unless, Rahu or Ketu involved, the effect of this transit will not lead to material discomfort but surely will affect the health of the native. The Saturn, when in 12th, sits on the mind, which represents the head which will have effects on this portion of the body. When transiting in - over the Moon sign, it will have effect on the central portion of the Body and when it is transiting below at the bottom of the Moon it will affect the bottom portion of the Body. This is the logic being used especially in northern India and some parts of southern India too.

Normally when Jupiter is linked during this period, professional matter will progress and if Venus is also linked then there will be prospects in material benefits provided Ketu, Mars and Rahu are not linked. Rahu, though, may not

affect particularly material matters, but will give hardships and definitely will harm health part of the native.

Marital

Apart from the rules given in ***Revelation from Naadi Jyotisha*** we introduce a new system in this paragraph. This we explain with a horoscope so that the matter becomes clearer.

Fig. 114: Female horoscope
Born on 8-09-1978: 9:55 AM

Ket . 03:12			
	Female Horoscope		Jup 06:58
			Me 4:09 St 11:52 Su 21:37
		Asc 10:15 Ve 7:18 MOO 26:43	Ra 3:12 Ma 28:40

In Naadi, generally, we see the link of Jupiter or Saturn to Mars whether the female marriage is promising or not. In this horoscope Saturn is having Mars in 2nd sign and in 11th to Mars there is exalted Jupiter. Therefore, the marriage is promising. There is of-course the effect of Rahu in between. However, the marriage is promising.

We adopt a different method and find out how the marriage will take place. Venus is the native and we consider it as Jeevakaraka and move it every year in one sign. Venus is in Libra for one year 2nd year - in Scorpio, 3rd year - Sagittarius, 4th year - Capricorn, 5th year - Aquarius, 6th year - Pisces, 7th year - Aries, 8th year - Taurus, 9th year - Gemini 10th year - Cancer, 11th year - Leo 12th year - Virgo. At the age of 12 he meets Mars and this is not a right age for marriage. In the similar hypothetical movement Venus comes to Virgo at 24th year of age. This is the right year to meet a life partner Mars. This is the year she should get married. At this age actual transit Saturn was in Taurus, retrograde, and Jupiter was in Gemini, retrograde, Rahu was with Jupiter in Gemini. Both Transits Saturn and Jupiter were linking natal Mars and natal Venus. The marriage took place in January 2002. This is one part of the story. For the other part of the story, let us move both husband and wife considering Venus is with husband Mars, to see their marital life. Immediately after Venus there are no planets. Both Venus, the wife, and Mars, the husband, reach to Pisces. In Pisces the Ketu, bitter enemy, is sitting like a wall not allowing Venus to proceed further. But Mars taking this chance of fighting of these two enemies and inability of Venus moving with him goes ahead to his own house Aries. Ketu, being a retro planet, pushes the Venus along with him to the sign Aquarius. From Aquarius, Venus gets link of Mercury and Saturn in Leo and Moon and Venus in Libra. This is an indication of her leaving the husband ahead and seeking change to get a different person, Mercury as husband. Saturn could have also another person but he is in Leo which is not a comfortable place and he is also governed by Sun which is again blocking him and therefore pushes Mercury who is his friend. Similarly, hypothetically moved Mars, in Aries, also gets the link of Mercury in Leo. This type of hypothetically moving of planets will give more clarity. It is showing clearly that there will be a break in marriage due

to the de-linking factor of Ketu as explained above. The marriage, of-course, ended in divorce. The process is on for 2nd marriage.

After experimenting on several horoscopes we are giving this unique method of hypothetical movement of planets to analyse the chart. We can apply this technique for Education, Profession (moving Mercury every year and Saturn every 2½ years) Marriage etc. We can also read about the relatives like Father, Mother, Brothers, Sisters, Husband, Son, Daughter etc. By moving Rahu and Ketu, we can understand the obstructions and ill effects the native is going to undergo by moving them in each sign (1½year in one sign).

Chapter 9

Doubts on Naadi Clarified

We would like to discuss some of the doubts expressed by our readers about Naadi system

There is a notion that the Naadi system which we are propagating does not consider Lagna and hence it is not in conformity with the conventional astrological norms.

Our Clarification

"... ***Kathithaphalaih parathorikalpaneeyah***" this verse is from brihat jataka of Acharaya Varahamihira from the 14th chapter 5th stanza.

This 14th chapter is about the results from the combination of two planets and in this 5th verse further he says that similar to the results given by him, rest of the results for other the combinations are to be arrived by using imagination and logic.

These results given by him are based on the combination of planets independent of Lagna or houses by using some prime significations represented by planets. This establishes the fact that there is a method to arrive at the results by combination of planets which is sanctioned by an authority not less than a great scholar like Varahamihira.

Therefore, Naadi is an authenticated system where in the results are derived by using combination of planets.

Having established the authentication for our system Naadi astrology, we would like to establish that during past 8 years our system has acquired popularity across the world and even there are students from foreign countries who are coming to India and learning this system from us. We are receiving feed back from the practicing astrologers who are extensively using this method and satisfying their customers.

Timing of event is based on slow moving planets and among these slow moving planets Jupiter is the fastest where in the events can be predicted on yearly basis. Many expressed their desire to know weather the event can be pinned down to further to shortest period using transit of other planets or with any other technique.

Our submission

Honestly speaking we have not ventured into that aspect due to the fact that in none of the Naadi granthas we find timing of events on day to day basis except for a few charts where the name of the year month and thithi or Nakshatra is mentioned. However, so far we could not find any clue to pin down events so closer.

This is also true in case of traditional astrology or for that matter the so called modern scientific systems introduced. In our experience with the above systems spanning more than 30 years we frankly admit that the tall claimed principles advocated by so called scientific astrology authors have miserably failed in repeated applications in pinning down date wise events. We do not deny the fact that there are scholars who can give date wise prediction but the methodology with which they predict is not universal and cannot repeatedly applicable by others.

In the case of Naadi every person who studies our system can apply the principle repeatedly and get the similar predictions for the charts and as far as timing of event is concerned all astrologers following this system of Naadi will time the event in the same year. Some of the Naadi astrologers with extraordinary occult achievements are also predicting the dates and as said earlier neither they nor we could document a principle for such accurate timing of events.

The subject is open for research and readers are requested to do research and find a solution for date wise prediction and enlighten us for which we shall be ever indebted.

There are doubts about method of analyzing twin birth or horoscopes of different persons born on the same day as our system do not consider Lagna.

How we go about it:

This problem exists even in the conventional astrology and even with so called scientific astrology. We get defensive statements from these sectors stating they use provisions 60th division chart prescribed in conventional astrology and the micro stellar division prescribed in the stellar astrology for twin births and for births of persons on same dates.

Practically there is no authenticated methodology in the classical texts with respect to analysis of divisional chart. There are number of articles scholarly authors of astrology prescribing methods to analyse divisional charts and they are all disputable personalised experiences and opinions but not a definite unfailing authenticated system.

In the stellar system 3rd and 4th divisions signify different components with in the span of 2 or 3 minutes which are attributed to lords and there will be shifting of houses in twin birth charts. Logically this sounds more convincing but

practicality it is again the personalised logic and principles which might work for an individual of exceptional power of intuition but not an unfailing authenticated rule.

We are not criticising any of the system but we are trying to highlight the limitations in the systems including Naadi.

We are therefore introducing the use of horary chart which is a must to study the birth chart in Naadi system. In the event of similar births, we use horary as a tool to study one chart and the other we go by natal chart .

This system of delineating based on horary is working well and we have experimented on many horoscopes and found to be satisfactorily working.

In our recent book *Revelation from Naadi Jyotisha*, we have introduced the Lagna with its limited usage. We are working on methods to bring the total concept of conventional astrology into Naadi system with necessary modifications and make unique system of predictions.

In some cases the results based on combination of planets given in Naadi books does not agree in total.

Our suggestion

The planetary combinations given in the books by our Guruji and by the author are based only on the signification planets. But in our works we have also indicated the influence of sign significations. We have to combine the significations of signs, mutual exchanges, and retrograde effects and logically combine the planetary significations to derive the ultimate results. Thorough knowledge of *karakatwa* of Rasi and the disposition of planets is a must to precisely arrive at the point. It is also essential to understand the functional nature and the subtle characteristics of planets and signs to develop new significations which will help in prediction.

In transit if Rahu or Ketu approaching Sun it indicates danger to either Father or Son. There are doubts among many whether to attribute the danger to Father or Son.

Our Advice

First and foremost, why should we bother about identifying whether it is Son or Father? In Naadi Sun is a common planet signifying both. You are studying the native's horoscope. In native's horoscope, according to his karma, the pleasures and pains that the native experiences through the relatives are indicated. We can simply say that due some danger either to Father or Son, the native may face tensions. This is what we should say from the native's horoscope. If native wants to know specifically, then call for the horoscopes of Son or Father and give the opinion. Let us not portray a persona of all knowing genius just to thrill the consultant. Humbly we should be there to solve the problems of the consultant by guiding him to overcome the problems rather than expecting praise from him for our correct predictions of his sufferings. Naadi astrology is to study karma and put the consultant on the right track of salvation.

.However, it is not ruled out that by studying the horoscope we can go deeper and tell many things. Such secret techniques are experiences and not formulas. Using horachart and hora lord is the best method to resolve secrets in the charts. Many such subtle readings are given in my previous book and some of them are appearing in this work also. It all based on the tricky way of combining the planets and it has to come by constant practice and study and each of them will develop their own skills in combining the significations not only of planets, the signs, of charts but also the audio visual significations noticed on the spot at the time of consultation.

We repeat all the rules or guide lines are to develop the metaphysical approach and use this knowledge for betterment of society.

What is said above is not only for Naadi astrology but also applicable to any other system of prediction. Never ever we can get a 100% fool proof method because the very subject of prediction is cosmic secret. Tall claims of accurate 100% prediction etc. are nothing but commercial attraction from a few fame oriented commercial occultist.

We must be happy to have this system of Naadi which has some methodology without confusion to read the problems of the native which will help the native to take precaution and get some remedies by surrendering to higher power.

Doubts about Gem prescription:

We claim

For the first time in the history of astrology, a unique system of prescribing gems to over come problems is introduced by the author in his previous works. We have been receiving countless feed back from practicing astrologers and readers about the wonderful results they are getting from using the gems based on our system of Gem prescription.

We have explained in detail about the methodology of gem prescription in our previous works. However we would like to mention that this principle is based on reflective and absorption qualities of rays of gem stones and this principle is working wonders ***to solve particular problem.***

We are on the threshold of unifying a method in consideration with the conventional astrology to have a common system of gem prescription. Probably we will make it up in our next project and hopefully publish shortly. Till such time without any doubt and irrespective of functional

nature and placement of planets in conventional astrology the system of gem prescription as explained by us in our works can safely be used **to get over a particular problem.**

Caution: The gem prescription best works when the inimical planets are transiting on result giving planets. However, the remedial gem prescription will only block the undesired event but it will not remove the karma effect. Therefore, the bad effect may re-appear in different form and at that time the gems may not function positively for that problem. Our experience confirms that only by ritualistic propitiation to deities representing planets can remove the effect of karma to a certain extent. However the gem prescription can be used for relief from a particular problem. **THERE ARE NO PERMANENT LUCKY GEMS, TALISMANS OR CHARMS.**

Chapter 10

Psychology in Naadi Astrology

The human behavioral study **dates** back to 1879. Since then the subject is progressively developing in to many branches covering new dimensions of life style. To name a **few**: Clinical psychology deals with mental or emotional disorders. Community psychology is about human behavior at home, at school, and in neighborhoods. Counseling psychology relates to helping people to **adjust to** life and make important decisions. Developmental psychology is total development from birth to death explaining about changes in behavior according to growing age. Educational psychology is about learning, teaching and about educational institutions. Environmental psychology is about the environmental resources and management in relation to human behavior. Experimental psychology is a human interaction and biology which includes even animals besides humans. Family psychology is all about family and relationships. Forensic psychologists are about the criminal behavior and guiding law enforcement. Geriatric psychology is about the psychology of older persons. Health psychology deals with psychological implications on health. Organizational psychology deals with work and employment relationships. Physiological psychology is about the psychological disorders due to drugs etc. Positive psychology is another new dimension towards **holistic** approach to mental **well-being**. Rehabilitation psychology deals in rehabilitation activity in relation to handicapped, or rehabilitation after trauma. Social psychology is about cultural, behavioral attitudes in society. Sport psychologists deals with equipping sports persons with mental preparation.

This science of psychology has history of thousands of years in India. The Vedas, Upanishads have glimpses of this science but due to the language in which they are presented it lacks the expertise translated versions. For that matter, the beginning chapters of "Bhagvat Gita" if well translated and understood will become a best personality development and positive thinking course. This can be vouchsafed, by reading the English version of "Bhagvat Gita" by Swami Chinmayananda. Any other part of the World has no record of such a powerful discourse on personality development and positive thinking about 3000 years back. The super-science to understand the human mind, life and beyond was developed by our sages much before 3000 years.

Modern psychology researchers have documented, evolved methods and machines to study the mind. They have introduced electrical and electronic gadgets to map the mental process. No doubt this is a great achievement and yet it has its own limitations in studying matters beyond life.

In contrast our ancients did not invent machines but introduced metaphysical approach to study the mind and to read beyond mind to understand the life itself. With these metaphysical tools they could go back to previous births and even know the secrets of creation.

Astrology is one such great tool through which we can know many things about the past and present of an individual. Unfortunately, we have lost many great works in this field due to foreign invasions and lost the track of true history. However, with the available material the scholars in this field have rebuilt certain systems which are being used by the astrological fraternity across the world.

The inventions in modern psychology are no small contributions. We must appreciate efforts of researchers in this field for their contribution in several fields. We should

incorporate these modern techniques in Astrology to expand its utility in the field of modern psychology.

In almost all the branches of psychology the main component of study is related to brain. There are different neurological studies related to this. Various experiments are being conducted to study the human brain. However we consider a small portion from the modern research work on brainwave theory to be explored through astrology to study conscious levels from a birth chart. For this purpose we need to co-relate the technical terms of brainwave theory with celestial terminology. First let us try to understand the science behind brainwave theory.

There are four types of brain waves called as Beta, Alpha, Theta and Delta. We are not considering Delta waves separately as it is the extended level of theta wave. Each brainwave has cycles counted per second having some functional significations which are given below:

Brainwave BETA-Frequency cycles per second 13 to 40: Ability to think, perform well, goal orientation, focus on positive thoughts, alertness, grasping of things for better future are all positive side of this wavelength. This is considered normal functioning wavelength.

Brainwave ALPHA-Frequency cycles per second 8 to 13: This is generally identified as relaxed state of mind, helpful in imagination and creativity. Imaginations include illusions, audio and visual impressions. It is a semi conscious state of mind or a hypnotic state of mind susceptible to auto or external suggestions. At this level the alertness will be at dormant state and many mind analysts' claims to induce this brainwave to reduce anxiety, stress, tensions, unwanted thoughts and sleeplessness caused due to functioning in conscious level of Beta brainwave. It is possible to recollect past memories being in lower frequency of Alpha

brainwaves. That is it travels through different memory locations in the brain. This is the sub-conscious level function.

Subconscious never ceases to exist and it is beyond age and time. It is an important wavelength which has the flexibility to modify stored memories. It guides the behavioral temperaments. It is not only the experiences of past of this life, but it also has the memories of past life. In the functional side brain has two hemispheres having active and imaginative functioning. The subconscious mind chooses to be imaginative. The active state functions logically and the subconscious mind will be receptive. While the active brain performs rationally, the subconscious brain functions illogically.

The subconscious mind is re-programmable as it will be in the hypnotic state. In the recent past many psychological counselors have started programmes called "past life regression". In this programme they claim that the bad memories or the evil effects of past life are removed. Basically this is a deep hypnotic suggestive programme and the person undergoing this programme will be put to hypnotic state (driving the brainwave to Alpha level) with suggestion of different modules developed by the psychologists. Similarly the sub-conscious mind is also receptive to negative or positive auto or external suggestion. This establishes the fact that both negative and positive impacts are possible being in this state and some times a person may function being in this sub-conscious level. Because of its complex nature we can identify this as abnormal state of mind.

Brain wave THETA-Frequency cycles per second 4 to 8: Inner self and intuitions, sensations, memories, and subtle emotions are the major activities involved in this brain frequency. Persons with predominance of Theta wave lengths are not self centered but will be society oriented. There will be free flow of ideas without any restriction or guilt. They will be positive in their mental state. Many of the activities

do not need alert state and they become automatic for the persons influenced by this wavelength. Such persons are prone to be unworldly and inclined towards metaphysical life. At lower frequencies they can read the mind of other persons. The occult faculties of brain will be predominant. They try to flee away from the bondages and are inclined towards higher knowledge. Some drugs induce a temporary feeling similar to this which is actually not the Theta or Delta state. Some sections of Sadhus do get addicted to drugs like Ganja etc, to experience this temporary feeling.

Beyond this state it is called Delta waves and this state is experienced by every body for a few seconds before going to deep sleep and/or before awakening from deep sleep. Permanently being in Delta state is possible only for yogis or self realised persons. This state is beyond super-consciousness or cosmic-conscious. In general it is a short period of transitory wave. Therefore we are merging it Theta wave and not discussing separately.

Karma theory and Brainwaves

All scientific explorations are based on the material resources and do not consider metaphysical approach. Therefore, time and again new findings will replace the previous discoveries. However we have to rely upon the great metaphysical science which explores secrets of very existence of life.

According to Sanatana dharma, a human being is born on this earth to clear his past karma. Either good or bad during the course of his life he has to experience the resultant effects of previous Karma with a free-will to put his efforts on the right direction to clear his past karma.

Past Karma and free-will are two components, which are very important in the Indian philosophy. The effects of

Karma either good or bad will have to be experienced. Free-will is to be trained based on the available resources of knowledge to understand the past effects and lead the life towards salvation.

Functional effects of Karma

The stored karma will have influence on mental emotions, physical performances and on material matters. These are called as Vasanas with which the human is born.

The Vasanas influence both positively or negatively based on the nature of karma and direct the person to lead life in this world to experience the respective stored karma. At the conscious level using free-will if a person conducts himself using guiding resources, the previous negative effects are nullified and positive effects will lead to fulfillment of purpose of life. Ignoring guidance with unguarded actions at free-will he will yield to gross ignorance and adds up negativity to the existing karma. This makes him chained in the birth and death cycle. This domain we attribute to Alpha brainwaves where a person can make or mar his life.

If the previous birth has already progressed in metaphysical achievements, then it will direct the present life in that direction causing rejections to material life. This aspect we attribute either Theta/Delta brainwaves.

However the very fact that the person is re-born indicates the balance of karma to be experienced in this birth. Therefore, it is inevitable for a person functioning mostly from theta level to express some of his activities at Alpha or Beta level.

Free-will functional aspect

The man has to function in the material world and therefore, whichever frequency is predominant as stated above he has to function at the common perceivable plane in whichever manner he exhibits his life style. This is possible when he directs his action in the alert state. This we attribute to Beta brainwave function.

In view of the similarities in the brainwave theory and karma theory we have to index for indentifying nature of karma. For this purpose we rely on Astrology. Having worked more on the Naadi astrology I prefer to choose this system of astrology for integrated presentation of brainwave theory.

Significations of Karma in Astrology and brainwaves

In Naadi Astrology planets are attributed with number of significations. However for the purpose of merging brainwave theory into Naadi astrology the signification of planets are reduced to single word as shown below.

Jupiter is Jeeva karaka i.e., **Life**

Saturn is Karma karaka i.e., **Karma**

Moon is Manah i.e., **Thought**

Mars is Deha and Shakti i.e., **Body** and **Power**

Mercury is Buddhi karaka i.e., **Skills**.

Venus is Bhoga karaka i.e., **Pleasures**

Sun is Padavi & Keerti i.e., **Esteem**

(Detailed significations of planets with their inter-behavioral aspects is discussed in our previous book "Revelation from Naadi Astrology" in chapter 6 page 23 - Sagar publications)

Brainwaves - conscious levels and planets

Without deviating from the scientific significations we have framed the different wavelengths in accordance with the philosophical approach

Conscious **level** functions are attributed to Beta brainwave

Sub-conscious level functions are attributed to Alpha brainwave.

Super-conscious level functions are attributed to Theta and Delta brainwave.

We have assigned the planetary significations for each level of consciousness as shown below:

Conscious level significations (Beta)

Life-Jupiter	Karma-Saturn,	Thought-Mind,
Skills-Mercury	Body-Power-Mars	Pleasure-Venus
	Esteem-Sun	

Generally these activities represented by seven planets are expressed in the normal state of alertness.

The classical texts of our ancient astrology, speaks volumes about the effect of Rahu and Ketu as chaya grahas. In Naadi effects of these two nodes are explicitly discussed.

Both Rahu and Ketu are not physical bodies. Basically they are energy zones created by revolving Moon around Earth. (For details refer "Revelation from Naadi Astrology"-Chapter 1 - Page 2- Sagar publications-Delhi). In this context Moon is assigned with signification of Thought. Therefore, Rahu and Ketu are energy zones of thought.

Ketu in Astrology is attributed to Metaphysical and social welfare matters which reject the material comforts. In our

brainwave theory Theta/Delta waves are attributed to Metaphysical states which fall under the Super-conscious category. Therefore Ketu indicates Super-conscious level.

Significations of Super-conscious (Theta/Delta): The significations of Super-consciousness Theta/Delta wavelength are Skill, Thought, Work, Pleasures and Esteem. This will reject or block the material side of Life, Skill, Thought, & Work and relates to humanitarian services and metaphysical activities.

Esteem remains Esteem whether it is at conscious or super conscious level. The body and power is expressed in Beta wave functions. When it operates from Super-conscious (Theta or Delta) level it exhibits stubbornness.

Rahu in astrology indicates Abnormality or eccentricity, Illusions, Imaginations, Shadow, Foreign, Search for unknown, Sin, Diseases, Dangers, Unethical, and Secret matters.

Sub-conscious significations (Alpha): it is already said that activities in this level are considered as abnormal with behavioral eccentricity which is one of the qualities of Rahu. The functional nature in this level is different from the normal functioning and hence it will be unusual or foreign in nature. The alpha state is sub-conscious level in which search goes on for unknown matters. If such secrets are positively influenced it turns to research orientation. Due its hypnotic state it generates illusions and imaginations and at alert level may force to take up activities relating to these fields. Due to half conscious many alert activities are shadowed. It activates sub-conscious wavelength and therefore, susceptible to the stored information about the past sin, unethical properties. These negativities will affect the physical well being and cause dangers in alert state. This may also further activate unethical and sinful activities to be performed under shadow for which it exhibits eccentricity and prefers to maintain secrecy.

Therefore, the qualities of Rahu are all applicable in Sub-conscious significations. To be precise we shall rephrase Sub-conscious significations (Rahu) as follows:

On the positive side: Research oriented, shadow, illusion and imaginative, foreign related activities and Secretive in nature. (For positive effect the Lead planets must co-operate)

On the negative side: Functional or relational abnormality, Unethical or sinful tendencies, sufferings due to previous karma.

Application of brainwave significations in Astrology

We know that Rahu and Ketu are not physical planets. Astrologically they are the product of Moon to which our great seers have attributed to Mind. Though invisible they cast their vibrations on other planets. The wavelengths of brain are also invisible.

Be it Super-conscious or Sub-conscious influence it must relate to significations of matters represented by seven planets falling in the conscious level. In other words the behavioral tendencies at conscious level are due to influence of Rahu (Sub-conscious) or Ketu (Super-conscious) on significations of other planets.

The brain wave theory explained above is again related to Mind. Rahu and Ketu also relates to Moon representing Mind. Therefore, the brain wave theory must have close relationship with Rahu and Ketu axis. Taking into account the similarities between brainwaves and the vibrations of Rahu and Ketu we have to identify their brainwave influences on the places from their position in the zodiac. The method of synchronising them and study different conscious levels in birth chart is the main object of this chapter.

In Naadi Astrology Rahu and Ketu will have effect on the sign they occupy. The 5th and 9th sign from them will have their effect. 2nd and 12th sign will also have their effect. To determine the effect on 2nd and 12th signs we need some logic of computation.

Mathematical Logic

We have different wave cycles for each category.

Alpha ranges between 9 to 14 cycles per second

Theta ranges between 5 to 8 cycles per second

Delta ranges between 1 to 4 cycles (not considered for computation)

Beta ranges between 15 to 40 cycles per second.

Total there are 40 cycles of brain and since we are not considering Delta wave the total wavelength will be 36 for the purpose of calculation.

The cycles are speed matter and the zodiac is space matter. We are trying to co-ordinate time and space matter here. Not attributing time and space concept, we have to take the digital values of Alpha, Theta/Delta waves cycles to determine the influential areas in Zodiac. Zodiac is of 360 degrees in which there are certain space divisions which are influenced by Rahu and Ketu which we have explained earlier. Three signs of Rahu and Three signs of Ketu total 6 signs are under the influence of these two invisible planets. Total 180 degrees are occupied by Rahu and Ketu. That means 90 degrees of space is operated on Sub-conscious level by Rahu and 90 degrees is operated by Ketu on Super-conscious level.

Rahu and Ketu also have effect on 2nd and 12th house from their position. These two or opposite nodes, and when their operational cycles are different, it is essential to find

out their influence which extends on either side of their position. Therefore, we have to take the digital cyclic figures for computation purpose.

The total zodiac is 360 degrees and the total cycles are 36 consisting of Alpha 6 and Theta 4. Beta 26,

For 36 cycles the zodiac span is 360 degrees

For 6 cycles of Alpha it is 60 degrees

For 4 cycles of Theta it is 40 degrees

Rahu and Ketu have already had their influences in 3 signs i.e. both put together it is 180 degrees.

Total area covered by them with the 2nd & 12th sign contribution is works out to :

$$60+40+180 = 280$$

The balance is 80 (360-280) degrees of Zodiac space is available for operation of Beta level.

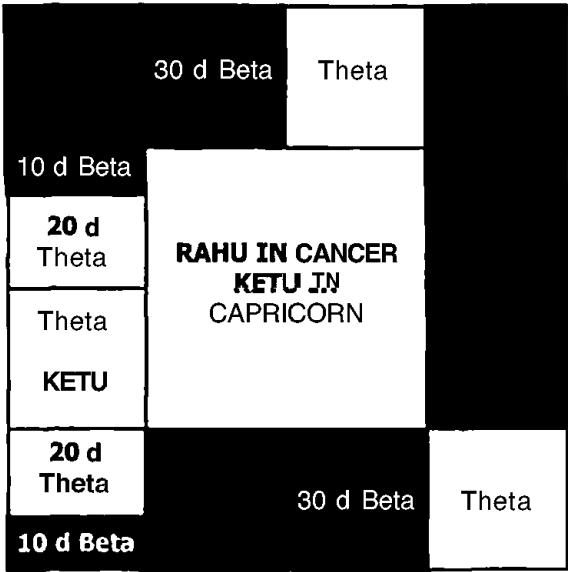

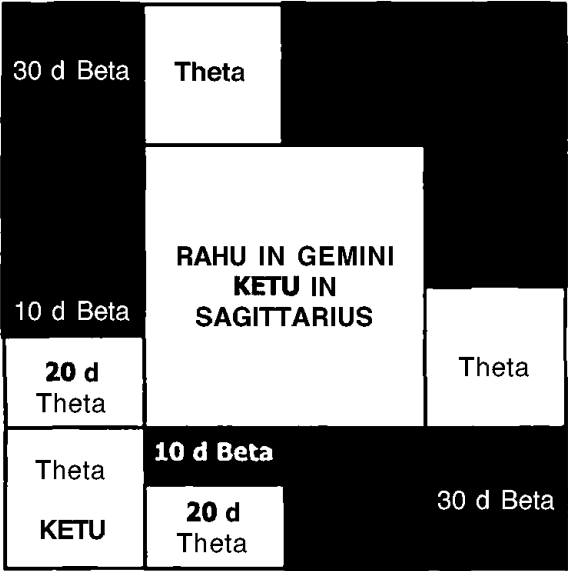

The 60 degrees of extra coverage for Rahu representing Alpha wave is allotted to 2nd sign 30 degrees and 12th sign 30 degrees. Similarly the 40 degrees of extra coverage of Ketu operates at 20 degrees on either side of Ketu.

With this computation we have identified the places of brainwaves in the zodiac. The planets falling in these sectors will represent the influence of brainwaves on the matter related to the planets.

We give charts for twelve positions of Rahu and Ketu in zodiac and mark the influence of brainwaves in those areas for ready reference.

Having identified the places of brainwaves in the chart, we have to determine the functional nature of planets with their modifications when they are influenced by brainwaves of Alpha & Theta/Delta (Rahu and Ketu)

Jupiter - Life

Conscious (Beta wavelength): Alert living conditions to lead successful life- takes care of life style.

Super-conscious (Theta or Delta wavelength-Ketu): Life orientation will be towards metaphysical life and careless about life style.

Sub-conscious (Alpha wavelength-Rahu): Abnormal life style, disturbed by past karma attracts diseases and dangers.

Saturn - Work

Conscious (Beta wavelength) Alertness in work

Super-conscious (Theta or Delta wavelength-Ketu): Rejection towards material activities and blocks or quits functioning. Supports metaphysical works

Sub-conscious (Alpha wavelength-Rahu):

On the positive side: Research oriented, Shadow, illusion and imaginative oriented, foreign related activities. Secretive in nature

On the negative side: Functional or relational abnormality, unethical or sinful with negative illusionary tendencies, and sufferings at functional level due to previous karma.

Moon - Thought

Conscious (Beta wavelength): Alert and conscious about thought process.

Super-conscious (Theta or Delta wavelength - Ketu): Metaphysical and humanitarian service oriented thoughts. Behavioral attitude will be opposite to accepted norms of material life. Deep thought process and gets into meditative state. Mind will be inclined towards the higher secrets and may develop intuitive powers.

Sub-conscious (Alpha wavelength-Rahu):

On the positive side: Uses imagination, research orientation, unusual planning abilities, but will be eccentric in attitude.

On the negative side: Due to past karma gets illusions, gets eccentric and confused. It will prompt towards unethical or unsocial activities. It prefers to function in imaginative or illusionary world.

Mars - Power

Conscious (Beta wavelength): Conscious utility of Physical powers and adjusts temperaments to given circumstances but may get exhausted over a period of time.

Super-Conscious (Theta or Delta wavelength-Ketu): Initiated towards higher powers. Controlled and timid temperaments, with restricted physical involvement, energy levels are super powered.

Sub-conscious (Alpha wavelength-Rahu):

On the Positive side: Being in an illusionary wavelength it may physically express in illusionary or imaginative activities with lesser physical powers.

On the negative side: Being in semi conscious state power gets weak. Careless about physical body and directed by temperaments of previous karma may involve positively or negatively in violent matters. Being in an illusionary wavelength may express physical and power in an illusionary or imaginary circumstances. It may hide facts and resort to unacceptable (not routine) activities.

Mercury - Skills

Conscious (Beta wavelength): Alert about Skills and acquires knowledge and keeps updating.

Super-conscious (Theta or Delta wavelength-Ketu): Rejects material skills and seeks higher knowledge in the metaphysical subjects.

Sub-conscious (Alpha wavelength-Rahu):

On the positive side: Research skills, Shadow, illusion and imaginative oriented skills, foreign related skills. (For positive effect the lead planets must function from other conscious level)

On the negative side: Abnormality in functional skills or blocks the required skills. Unethical or unsocial skills. Sufferings in acquiring skills.

Venus - Pleasures

Conscious (Beta wavelength): Conscious about the limitation in pleasures and strives to get perceivable pleasures.

Super-conscious (Theta or Delta wavelength-Ketu): Rejects materialistic pleasures and seeks higher level pleasures in metaphysical plane.

Sub-conscious (Alpha wavelength-Rahu):

On the positive side: Pleasures in shadow, fulfills pleasures by illusion and imagination. Wishes for variety in pleasures and likes pleasures of foreign nature (For positive effect the lead planets must function from other conscious level)

On the negative side: Abnormality in seeking pleasures. Seeks unethical, unsocial or secret pleasures and suffers in relational matters due to past karma.

Sun - Esteem

Conscious (Beta wavelength): Alert in maintaining required Esteem and strives for it.

Super-conscious (Theta or Delta wavelength-Ketu): Esteem is essential irrespective of material or metaphysical life. Hence it supports Esteem in both Conscious and Super-conscious level.

Sub-conscious (Alpha wavelength-Rahu):

On positive side: Esteem when operates in this level it indicates hardships in maintaining or achieving it.

On negative side: Negatively linked lead planets to esteem may cause ill effects on esteem and humiliations are inevitable.

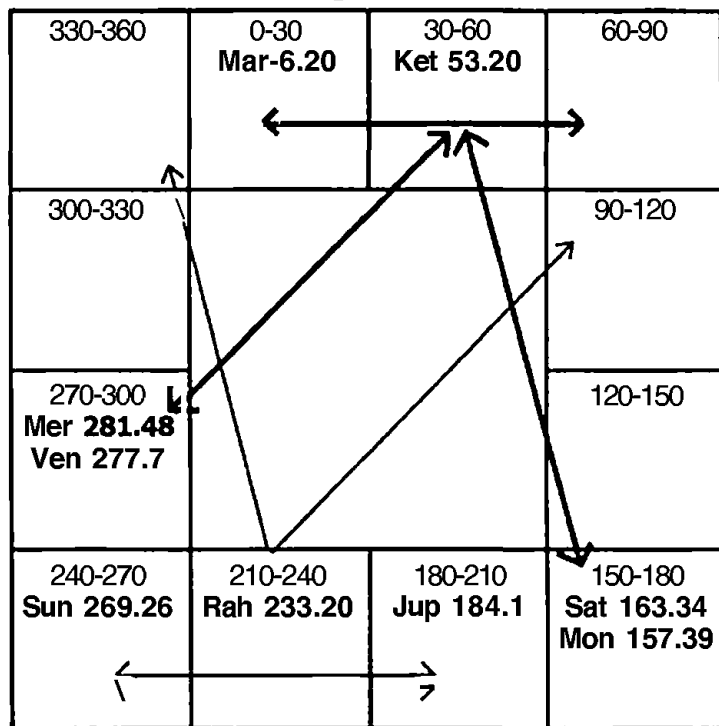

Use of Brainwave theory in Naadi Astrology

This is not a predictive tool. But it only helps in identifying the predominant functional brainwave at different matters of life. At the out set it will help in finding out the orientation of life. This will also help in deciding harmonic wavelengths between two persons. This will help in counseling marital matters. It will be useful in selecting education and professional line. Study of brainwaves can be extensively used

in H.R.D matters for recruiting right persons. It can be used to identify the line of progress or fall in a particular field.

This can be used in birth chart to identify the core effect of life. Let us examine the practical application on four horoscopes.

Fig -115

In the above chart Rahu is in 233.20 in Scorpio and he will be moving towards Libra. His Alpha effect will be in Scorpio and the next 30 degrees of Libra i.e. 210 to 180. From 180 to 120 degrees upto Leo will be Beta wavelength. The sign Cancer from 120 to 90 will be Alpha wavelength due to 5th Aspect of Rahu. 90 to 80 in Gemini will be Beta wavelength.

From 80 to 60 in Gemini the rear effect of Ketu will be dominant with the Theta wavelength. 60 to 30 Taurus with Ketu will be Theta Wavelength. From 30 to 10 of Aries will be Theta wave of Ketu. From 10 degrees to 360 degrees end of Pisces will be Beta effect. From 360 to 330 of Pisces will be Rahu effect with Alpha wave being 9th aspect of Rahu.

From 330 to down 270 down will be Beta wavelength. 270 to 240 of Sagittarius will be Alpha wavelength. We are back to Rahu with Alpha effect in Scorpio.

We will see the planetary position falling in these different wavelengths.

Mars is posited in 6.20 degrees where the Ketu effect stops at 10 degrees in Mesha. Therefore Mars is in Conscious (Beta) wavelength falling in 10 to 360 of Pisces. The Body and power factor is in Conscious state.

Saturn and Moon in Virgo in Super-conscious level i.e. Theta/ Delta wavelength.

Jupiter is in Libra and it is in Sub-conscious i.e. Alpha wavelength.

Sun is Dhanush falling in Sub-conscious spell of Alpha wavelength.

Mercury and Venus are in Capricorn in Super-conscious state of Theta & Delta wavelength.

The indications from the wavelengths of these planets are given below.

Mars in Conscious state:

Conscious (Beta wavelength): Conscious utility of Physical powers and adjusts temperaments to given circumstances but may get exhausted over a period of time

Saturn in Super-conscious level:

Super-conscious (Theta or Delta wavelength):

Rejection towards material activities and blocks or quits functioning. Supports metaphysical works

Moon in Super-conscious level:

Super-conscious (Theta or Delta wavelength):

Metaphysical and humanitarian service oriented thoughts. Behavioral attitude will be opposite to accepted norms of material life. Deep thought process and gets into meditative state. Mind will be inclined towards the higher secrets and may develop intuitive powers.

Jupiter in Sub-conscious state:

Sub-conscious (Alpha wavelength): Abnormal life

style, disturbed by past karma attracts diseases and dangers.

Sun in Sub-conscious level

Sub-conscious (Alpha wavelength): On positive

side: Esteem when operates in this level it indicates hardships in maintaining or achieving it. This is applicable to the above horoscope.

On negative side: Lead planets linked to esteem if

operates from this level then fall from Esteem and humiliations are inevitable.

Mercury and Venus are in Super-conscious level

Mercury:

Super-conscious (Theta or Delta wavelength):

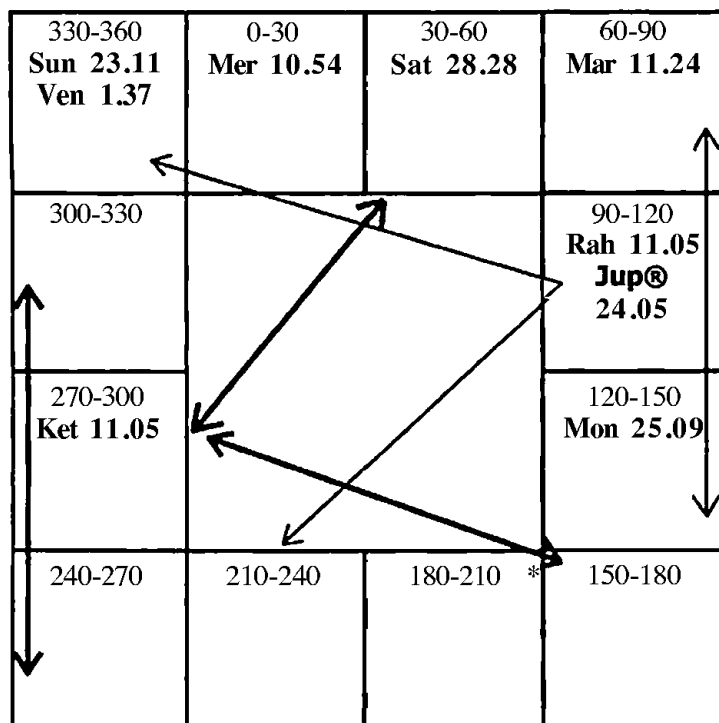

Rejects material skills and seeks higher knowledge in the metaphysical subjects.

Venus:**Super-conscious (Theta or Delta wavelength):**

Rejects materialistic pleasures and seeks higher level pleasures in metaphysical plane.

This is a classical example to show that except Body & Power no other planet is conscious level of Beta wavelength. This is the horoscope of Swami Vivekananda which does not need any further explanation.

However unless a contrast example is given we will not be establishing the theory convincingly. We shall take up another horoscope for examination.

Fig -116

Jupiter, Moon, Mars, Sun & Venus are all in Sub-conscious Alpha wave.

Mercury though in Conscious Beta wave has the influence of Moon who is in Sub-conscious Alpha wave.

Saturn is in Super-conscious Theta & Delta wave.

We will see the effect of these from the significations.

Jupiter, Moon, Mars, Sun, Venus, operating from Sub-conscious level and Saturn alone is in Super-conscious level and Mercury is in conscious level but influenced by Moon from Sub-conscious level.

Jupiter- Sub-conscious level

Sub-conscious (In Alpha wavelength): Abnormal life style, disturbed by past karma attracts diseases and dangers.

Moon- Sub-conscious level

Sub-conscious (In Alpha wavelength): Due to past karma gets illusion, gets eccentric and confused. It will prompt towards unethical or unsocial activities. Prefers to function in imaginative or illusionary activities

Mars- Sub-conscious level

Sub-conscious (Alpha wavelength): Being in semi conscious state power gets weak. Careless about physical body and directed by temperaments of previous karma may involve positively or negatively in violent matters. Being in an illusionary wavelength may use physical appearance in illusionary or imaginary or foreign activities.

Venus- Sub-conscious level

Sub-conscious (Alpha wavelength):

On the positive side: Pleasures in shadow, fulfills illusion and imaginative pleasures. Pleasures of foreign nature (For positive effect the Lead planets must function from other conscious level)

On the negative side: Abnormality in seeking pleasures. Seeks unethical or unsocial pleasures and suffers in relational matters due to past karma. For this horoscope it is functioning from this level hence it is applicable.

Mercury - Conscious level

Conscious (Beta wavelength): Alert about Skills and acquires required knowledge and keeps updating.

Due to influence from Sub-conscious moon turns the acquired knowledge on negative side

On the negative side: Abnormality in functional skills or blocks the required skills. Unethical or unsocial skills- Sufferings due to previous karma to acquire skills- This is applicable to this horoscope.

On the positive side: Research skills, Shadow, illusion and imaginative oriented skills, foreign related skills.

Sun- Sub-conscious level

On positive side: Esteem when operates in this level it indicates hardships in maintaining or achieving it.

On negative side: Lead planets linked to esteem if operates from this level then fall from Esteem and humiliations are inevitable. These apply to the above horoscope.

Saturn- Super-conscious level**Super-conscious (In Theta or Delta wavelength):**

Rejection towards material activities and blocks or quits functioning. Supports metaphysical works

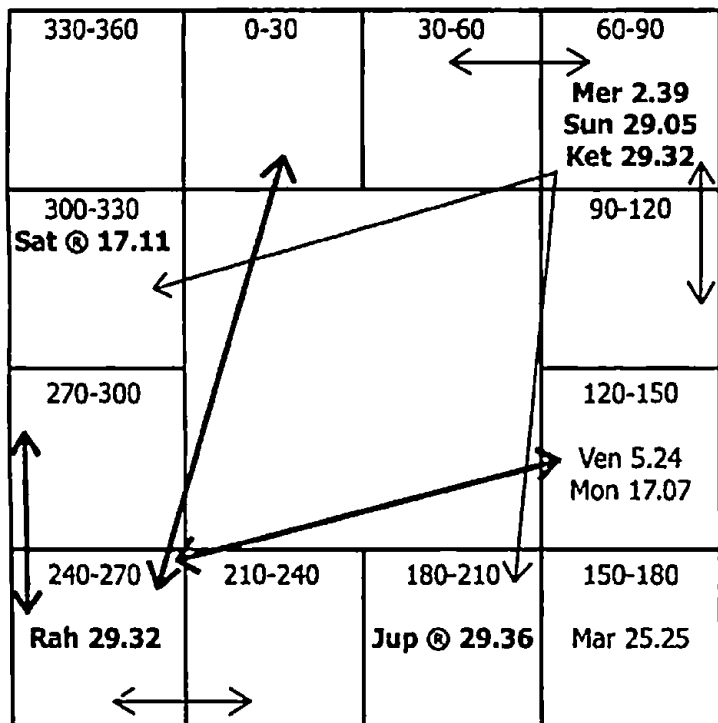

Note: When most of the planets are in Alpha state functioning negatively the work force cannot function at metaphysical level. Therefore rejection of normal work is right in this case.

This horoscope belongs to famous criminal Charles Shobharaj. The wavelength narratives given above are self explanatory to indicate his prime functional level of brainwave.

Let us study two more contrast horoscopes for further confirmation of applicability of the theory.

Fig-117

One more example showing functioning of mixed conscious state.

Saturn is in Super-conscious state but by retrograde goes to Sub-conscious state. This shows struggles at work force.

Jupiter is in Super-conscious state by retro goes to conscious level to join Mars.

Mercury and Sun are strongly functioning from Super-conscious level. Venus and Moon are under the spell of Sub-conscious indicating troubles to thoughts and comfort levels.

This is the horoscope of Dalai Lama the Tibetan monk. The sufferings and struggle of this monk to maintain Tibetan tradition and his mission is well known. He has to take shelter

Saturn the work has reverted from functioning at Super-conscious level and chooses to function at Conscious level where it gets the Skill (Mercury) and fallen esteem (Sun) to support negatively to work in conscious level.

The effect of pleasure orientation from Venus and the thought process of Moon which is under the spell of Rahu get the power planet Mars who is also under the spell of Rahu is a clear indication of negative factors attached to them. All these factors drive the native to negative activities even at the conscious level.

This is the horoscope of a person who started a cult which was a Christian destructive, doomsday cult. Though he started to preach human freedom, equality, and love, later it turned out to be communistic. The movement moved to different places before it was subjected to illegal activities within the Temple

Most shocking development was the translation of belief that death of his and his followers would move them to another planet. Due to many of his lunatic acts there were number of deaths by consumption of cyanide.

All these are due to the effect of functioning under the illusionary wavelength of Rahu which has its spell on the most vital functionary planets of life.

We repeat this theory is not for astrological predictions it only indicates the predominant wavelengths of a person.

This is a research work which has been established by analysing many horoscopes in our classes. This is a remarkable breakthrough to bring a portion of psychology connected with the brainwave into the subject astrology. With the finer modifications, perhaps we may bring other psychological parameters into Naadi astrology.

Birth charts indicate the overall brainwave functions of different conscious level in the life. We must use transit of planets and their prevailing conscious level or wavelength and read them with birth chart which indicates the basic wavelengths of different matters of life. We can use this tool to understand the prevailing mental condition by using it in transit position. We can use this to find out suitable and matching wavelengths to execute day to day matters. By incorporating hora lord, we can also pin down to hourly basis of matching the wavelengths.

Brainwave theory in Traditional Astrology

Experiments in class room on the horoscopes of students amazingly resulted in exhibiting their basic functional wavelengths in different activities of life. Some of the students expressed their desire to know the method of applying this theory for traditional system of astrology. Any principle set for a matter should universally applicable irrespective of analytical systems involved in the topic. However unlike limited basic principles of Naadi the classical method of astrology has several data resources for consideration. The application of studying wavelength theory must also be changed to meet the demand of the system. To incorporate wavelength theory in conventional astrology we furnish essential principles of traditional astrology.

A matter is denoted by a house, its lord and has a special signifier for each house. Apart from this each planet has its own natural significations which will blend with the matters of house while bestowing results. A house signifies many matters. There are twelve houses counted from the Ascendant. These twelve houses operate under their lords. Out of seven planets excluding Sun and Moon, the rest of the five planets hold two houses under their lordship. Sun

and Moon operate one house each. By position and aspect the planets modify the effects of houses and the karaka. A planet is disposed to give results holding different dignities as shown below:

1. As Lord of the house
2. As occupant of a house
3. As signifier of house under his aspect
4. As signifier of houses ruled by planets influencing this planet
5. As signifier to houses falling under exchange with another planet
6. As signifier to houses owned by planets having special relationship in certain places
7. As natural signifier
8. As dasha lord
9. The quantum and quality of results depends on the unique disposition of planets to each ascendant.

Conventional astrology has innumerable principles which cannot be incorporated in this limited space dealing with different subject. Nevertheless we are providing essentials to fit in the application of wavelength theory.

Houses 1, 4, 7, 10 are called Kendra which denotes the self, comforts, marital bliss and professional matters. The 5th and 9th houses are called Kona. 5th house represents wisdom and progeny and 9th house indicates past merits and religiousness. Lord of 3, 6 & 11 are called sinister while the 11th house is considered best place for all planets. Houses 8, 12 and again 6th house are considered as bad. 3rd house represents span of life. 2nd and 7th houses but for material benefits are considered as death inflicting houses. Each house

has many matters for studying the life of native. We give below gist of house matters functioning under different categories.

House	Living matter	Non living	Behavioral
1	Self	Health	Character
2	Family	Wealth	Speech
3	Siblings	Courage	Communication
4	Mother	Comforts	Learning
5	Progeny	Creativity	Intellect
6	Enemy	Debt-Sick	Hard work
7	Spouse	Lust	Adjustability
8	Life-span	Destruction	Unethical
9	Father	Past merits	Religion
10	Living-Status	Profession	Fame
11	Friends	Heal-Profit	Co-operation
12	Immobility	Salvation	De-link

Each house has a lord, a Karaka and it may or may not have planets posited in it.

We know that we are not using the application of brain wave theory for astrological analysis. The aim of this topic is to find out different conscious level under which the signification of a house, its lord, its karaka and the planet posited in them will function.

The wavelengths by themselves do not indicate positive or negative effects just because they are falling in certain conscious level. The harmonic relationship between the matter and the functional dignities of wavelengths will determine the nature of functional abilities of the native and the mental status to experience the end results. This is a logical approach and needs fine tuning to frame as a rule.

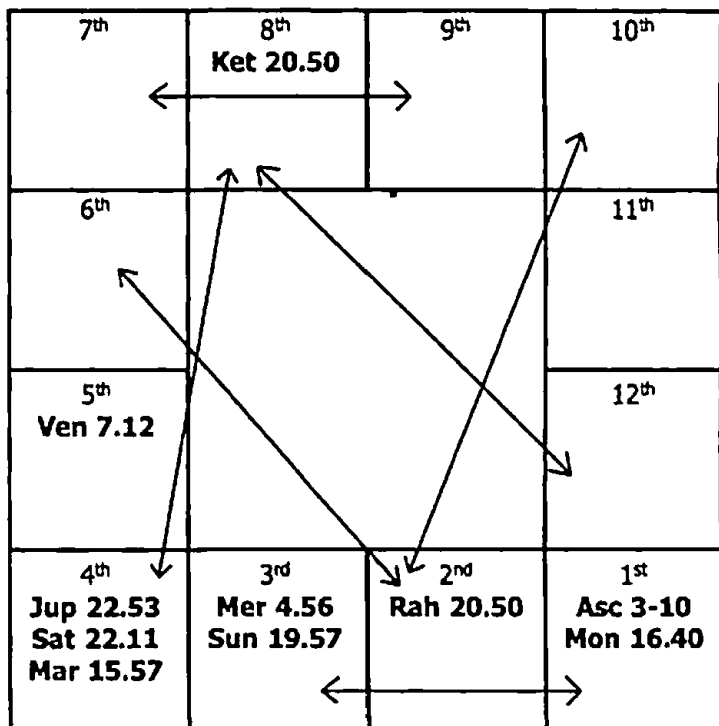

We have already identified the areas that functions under different conscious levels while discussing Naadi system. For traditional astrological applications we need to assess conscious levels for each house, for its lord, for its Karaka and for the planet posited in a house separately to sum up the functional behavior related to the matters of each house.

This will give the basic brain waves that operate on the matters of life of the native. We know that there is every possibility of shifting from one wavelength to other due to certain eventualities, external influences and the learning experiences. This we have to find out by assessing Dasha lord by his present wavelength position in comparison with the birth position. For this purpose transit position of planets in comparison with birth chart are to be studied for their present functional level of wavelengths. The sign lord where the Dasha lord is posited both in natal and transit chart is also to be assessed with reference to conscious levels. We should also assess the harmonics between the wavelengths of sub-period lord and the Dasha lord.

These are some of the elementary methods proposed. Perhaps further research in this field is essential to arrive at a precise system.

We shall take-up take up a horoscope and try to apply some of the above principles to find out wavelengths under which the houses, lords and planets are functioning.

Fig -119

Example horoscope of **Walt Disney**

Ascendant Virgo is in Alpha brainwave indicating the illusions and imagination. This has the Moon who is lord 11th house indicating success factor falling under illusion and imagination. Moon is also a planet of mind and arts who is in Alpha wave. Moon is having aspect on 7th house a house of adjustability and also represents partnerships.

2nd house, indicating the speech is in Alpha brainwave indicating imagination and illusions in speech. It has the main planet of Alpha wave Rahu who is influencing the 10th house of profession and 6th house of hard work. Rahu is also influencing 1st house and 3rd house. 3rd house of communication is also under Alpha wave which indicates illusions and imaginations. 3rd house has **Mércury** who signifies communication and naturally enhances that matter represented by 3rd house. 3rd House has Sun in it. Sun is a planet of success who is in 3rd house. Sun is a 12th lord where the 12th house falls in the Super-conscious level. While the lord of 12th falls in Sub-conscious level. It indicates the interchanging of wavelengths Alpha and Theta with respect to 12th house. Both Mercury and Sun influence 9th house which is operating in Theta level under the influence of Ketu.

Ketu is in 8th house which is falling in Theta level, Ketu influencing 4th house which has Jupiter the lord of 4th posited in it. Jupiter's aspect is on 10th, 12th & 8th houses with the influence of Super-conscious mind. Saturn who is the lord of 5th indicating creativity, as lord 6th indicating hard work and he is posited in the 4th house of knowledge. Saturn is having aspect on his own 6th house, 10th and 1st houses from the Super-conscious level. Mars is lord of 3rd house which is under Sub-conscious spell and the 8th house is falling in Super-conscious level. Mars is posited in 4th house indicating the faculty of learning falling in two different wavelengths.

Ketu from 8th house is casting his aspect on 4th & 12th house and influences 7th & 9th houses. This indicates that the houses 4, 7, 8, 9, 12 are all operated by Super-conscious level to help the relative matters linking to Alpha level. 5th house is functioning in Conscious level but it has Venus lord of 2, 9 having influence of both Super-conscious and Sub-conscious. The creativity thus gained uniqueness.

This horoscope belongs to a famous film personality with unique talent on film making. The name of Walt Disney in the history of film world is ever remembered. His creative productions of cartoon films were evergreen and are viewed by people of all ages even today. The prime occupational aspect itself was based on illusionary and imaginations which we can see from the horoscope. We try to give brief analysis of houses and planets which will throw the light on their functional wavelength.

The following Dasha periods are also analysed to find out the prevailing wavelength during their operational period.

Mars was operating during his childhood. Mars was operating in Theta level and being in 4th covers 10th, 11th, and 7th houses by his aspect. It was period of dependent life driven by the significations of the houses.

Rahu Dasha started in 1913 this was the period of Sub-conscious level functioning allowing him to learn drawing etc.

After gaining knowledge in illusionary and imaginative applications, he had to executive without any illusions and imagination.

Jupiter Dasha commenced in 1931 and Saturn Dasha commenced in 1947 lasted till 1966. Both the planets were functioning in Theta level. Though many cartoon pictures were produced during this period the native never bothered about the material benefits. This is due to functioning of super-conscious level.

Mercury period started in 1st December 1966 which is operating in Alpha period, which is also lord of Ascendant and having placed in 3rd indicating life span falling in Alpha state which has ended his life during December 1966.

We repeat that, this is not astrological predictions, but we are only indicating how the wavelengths functions at different levels pertaining to the house matters.

This is a humble effort to bridge gap between super science astrology with the modern science psychology pertaining to brainwave theory.
